Oral Formulaic Theory And Research:

Oral-formulaic Theory and Research John Miles Foley, 1985 Interpretations of Beowulf Robert D. Fulk, 1991-03-22

Interpretations of Beowulf brings together over six decades of literary scholarship. Illustrating a variety of interpretative schools the essays not only deal with most of the major issues of Beowulf criticism including structure, style, genre and theme but also offer the sort of explanations of particular passages that are invaluable to a careful reading of a poem. This up to date collection of significant critical approaches fills a long standing need for a companion volume for the study of the poem. Larger patterns in the history of Beowulf criticism are also traceable in the chronological order of the collection. The contributors are Theodore M. Andersson, Arthur Gilchrist, Brodeur, Jane Chance, Laurence N. de Looze, Margaret E. Goldsmith, Stanley B. Greenfield, Joseph Harris, Edward B. Irving Jr., John Leyerle, Francis P. Magoun Jr., M. B. McNamee, S. J. Bertha S. Phillpotts, John C. Pope, Richard N. Ringler, Geoffrey R. Russom, T. A. Shippey and J. R. R. Tolkien.

An Oral-Formulaic Study of the Qur'an Andrew G. Bannister, 2014-04-24 The Qur'an makes extensive use of older religious material, stories and traditions that predate the origins of Islam and there has long been a fierce debate about how this material found its way into the Qur'an. This unique book argues that this debate has largely been characterized by a failure to fully appreciate the Qur'an as a predominately oral product. Using innovative computerized linguistic analysis this study demonstrates that the Qur'an displays many of the signs of oral composition that have been found in other traditional literature. When one then combines these computerized results with other clues to the Qur'an's origins such as the demonstrably oral culture that both predated and preceded the Qur'an as well as the folk

memory in the Islamic tradition that Muhammad was an oral performer these multiple lines of evidence converge and point to the conclusion that large portions of the Qur'an need to be understood as being constructed live in oral performance. Combining historical linguistic and statistical analysis much of it made possible for the first time due to new computerized tools developed specifically for this book Bannister argues that the implications of orality have long been overlooked in studies of the Qur'an. By relocating the Islamic scripture firmly back into an oral context one gains both a fresh appreciation of the Qur'an on its own terms as well as a fresh understanding of how Muhammad used early religious traditions retelling old tales afresh for a new audience

A Key

to Old Poems Alain Renouf, 1988 This book examines the fundamental principles whereby the tradition of Indo-European oral formulaic composition provides a context for the critical interpretation of certain kinds of English and German Medieval poetry. Renouf's purpose is to apply the rapidly increasing amount of original and far-reaching research in oral formulaic theory and tradition to the critical interpretation of poetry. He concentrates on works of recognized literary merit such as *Beowulf* and the *Hildebrandslied* primarily because the book is aimed at English speakers and the examination of major poems drawn from early English and immediately related cultures is more relevant to this audience and because a preponderance of the masterpieces of oral formulaic composition that have survived are in the West Germanic tradition. In contrast to many oral formulaic investigations this study is primarily concerned with the literary quality of the materials examined. It is addressed to all scholars concerned with Medieval English poetry and its roots scholars concerned with Germanic philology and oral formulaic matters and scholars concerned with literary interpretation in general. Further it has considerable potential for use by students and in the classrooms
