Lapedes, 1976 Includes index      **Levolution** Michael Gunter, 2014-10-07 Without Levolution there would be no gravity stars or life but up until now the self similar properties these energetic systems has been obscured Michael Gunter an ecologist examines the Levolution process which underlies a whole new paradigm that explains how the universe works and what it is doing It is responsible for creating every type of naturally occurring system we know In easy to understand language Gunter explains how Levolution is based on simple properties of energy flowing in systems Learning how it works will help you understand the cosmological relevance of energy and its laws the contents of the universe as twenty three levels of increasing entropically functional order imposed on a single batch of energy that the universe appears to have a purpose The end result is an entirely new perspective on what we call order and a new spin on what ancient and recent thinkers have said about the nature of the universe The newly proposed Laws of Functional Order will equip you to understand the profound role of thermodynamic natural selection universal evolution and the cosmic order caused by Levolution      Metemphysics Daniel Reurink, 2024-11-29 Metemphysics Quantum Relativity is the unique idea s of the author which paint the very fabric we call existence The idea of Entropy based into various fields and the supporting and coinciding relationships to science reason and mysticism are explored within the concepts of entropy in the premise of disorder order and chaos This book probes the mystery of the mind and applies a new definition to quantum mechanics and general relativity under one model of a system called Metemphysics Metemphysics is based on Pythagoras idea of Metempsychosis which supports to transmigration of souls through various vehicles Metemphysics is using this same cyclic idea as the ordering process of reality in which science is supported to the mysteries ancient and futuristic wisdom This book contains ideas of space time supernova black holes metaphysical ideas religious connotations occult mysteries and application of how to use formulas within the models created The models represented are based upon Einstein Hawking Clausius Maxwell Newton Discordia and various other author s who support The Great Work This new paradigm for the shifting sands of time and also contains knowledge and wisdom from previous scientists and mystics For one does not tear down the old to build the new one builds the new with the old This book

Cory Jr.,2012-12-06 The present work is the second in a series constituting an extension of my doctoral thesis done at Stanford in the early 1970s Like the earlier work *The Reciprocal Modular Brain in Economics and Politics Shaping the Rational and Moral Basis of Organization Exchange and Choice* Plenum Publishing 1999 it may also be considered to respond to the call for consilience by Edward O Wilson I agree with Wilson that there is a pressing need in the sciences today for the unification of the social with the natural sciences I consider the present work to proceed from the perspective of behavioral ecology specifically a subfield which I choose to call interpersonal behavioral ecology th Ecology as a general field has emerged in the last quarter of the 20 century as a major theme of concern as we have become increasingly aware that we must preserve the planet whose limited resources we share with all other earthly creatures Interpersonal behavioral ecology however focuses not on the physical environment but upon our social environment It concerns our interpersonal behavioral interactions at all levels from simple dyadic one to one personal interactions to our larger even global social economic and political interactions      **Principles of Chemistry** Loren G. Hepler,Wayne L. Smith,1975      **Military Thought** ,2007      **What Caused the Big Bang?** Rem B.
