## **Ordinary Consumption:**

**Ordinary Consumption** Jukka Gronow, Alan Warde, 2013-01-11 The sociology of consumption has concentrated unduly on the more spectacular and visual aspects of contemporary consumer behaviour thereby constructing an unbalanced and misleading view This collection emphasises ordinary rather than extraordinary items routine and repetitive behaviour rather than conscious decision making It studies practical contexts of use rather than decisions to purchase and analyses collective identification rather than personal identity Each essay argues one or more of these points for the most part using new empirical material from several different national contexts The topics analysed include shopping in Taiwan second home ownership in France environmental considerations concerning food choice in Denmark the take up of new domestic technologies in Finland and kitchen design in England Key concepts like tradition routine and habit are clarified and new conceptual distinctions are made with the book defending theoretical approaches deriving from Simmel Weber Durkheim and Bourdieu Ordinary Consumption promotes a distinctive approach to the understanding of the central practices of consumer society it is a book with a controversial message one which will be a source of debate about the appropriate agenda for future research

**demand** Andrew McMeekin, Mark Tomlinson, Ken Green, Vivien Walsh, 2013-07-19 The structure and regulation of consumption and demand has recently become of great interest to sociologists and economists alike and at the same time there is growing interest in trying to understand the patterns and drivers of technological innovation This book brings

together a range of sociologists and economists to study the role of demand and consumption in the innovative process The book starts with a broad conceptual overview of ways that the sociological and economics literatures address issues of innovation demand and consumption It goes on to offer different approaches to the economics of demand and innovation through an evolutionary framework before reviewing how consumption fits into evolutionary models of economic development Food consumption is then looked at as an example of innovation by demand including an examination of the dynamic nature of socially constituted consumption routines The book includes a number of illuminating case studies including an analysis of how black Americans use consumption to express collective identity and a number of demand innovation relationships within matrices or chains of producers and users or other actors including service industries such as security and the environmental performance of companies The involvement of consumers in innovation is looked at including an analysis of how consumer needs may be incorporated in the design of high tech products The final chapter argues for the need to build an economic sociology of demand that goes from micro individual through to macro structural features An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence      **The Lancet** ,1911
