Lukasiewicz's Logics And Prime Numbers:

Lukasiewicz's Logics and Prime Numbers A. S. Karpenko, 2006 Is there any link between the doctrine of logical fatalism and prime numbers What do logic and prime numbers have in common The book adopts truth functional approach to examine functional properties of finite valued Lukasiewicz logics L_n 1 Prime numbers are defined in algebraic logical terms Finiteness theorem and represented as rooted trees The author designs an algorithm which for every prime number n constructs a rooted tree where nodes are natural numbers and n is a root Finite valued logics K_n 1 are specified that they have tautologies if and only if n is a prime number It is discovered that K_n 1 have the same functional properties as L_n 1 whenever n is a prime number Thus K_n 1 are logics of prime numbers Amazingly combination of logics of prime numbers led to uncovering a law of generation of classes of prime numbers Along with characterization of prime numbers author also gives characterization in terms of Lukasiewicz logical matrices of powers of primes odd numbers and even numbers *The History and Philosophy of Polish Logic* K. Mulligan, K. Kijania-Placek, T. CASC'99 Victor G. Ganzha, Ernst W. Mayr, 1999-05-31 The development of powerful computer algebra systems has considerably extended the scope of problems of scientific computing which can now be solved successfully with the aid of computers. However, as the field of applications of computer algebra in scientific computing becomes broader and more complex, there is a danger of separation between theory systems and applications. For this reason, we felt the need to bring together the researchers who now apply the tools of computer algebra for the solution of problems in scientific computing in order to foster new and closer interactions. CASC 99 is the second conference devoted to applications of computer algebra in scientific computing. The first conference in this sequence, CASC 98, was held 20-24 April 1998 in St. Petersburg, Russia. This volume contains revised versions of the papers submitted by the participants and accepted by the program committee after a thorough reviewing process. The collection of papers included in the proceedings covers various topics of computer algebra: methods, algorithms, and software applied to scientific computing; symbolic, numeric, analysis, and solving differential equations; efficient computations with polynomials, groups, matrices, and other related objects; special purpose programming environments; application to physics, mechanics, optics, and to other areas. In particular, a significant group of papers deals with applications of computer algebra methods for the solution of current problems in group theory, which mostly arise in mathematical physics. *Proceedings IEEE Staff*, 2002. This text contains information on computational mathematics and complexity theory as presented at the 32nd IEEE International Symposium on Multi-Valued Logic ISMVL 2002.
