Quality Assessment Joss Moorkens, Sheila Castilho, Federico Gaspari, Stephen Doherty, 2018-07-13 This is the first volume that  
brings together research and practice from academic and industry settings and a combination of human and machine  
translation evaluation Its comprehensive collection of papers by leading experts in human and machine translation quality  
and evaluation who situate current developments and chart future trends fills a clear gap in the literature This is critical to  
the successful integration of translation technologies in the industry today where the lines between human and machine are  
becoming increasingly blurred by technology this affects the whole translation landscape from students and trainers to  
project managers and professionals including in house and freelance translators as well as of course translation scholars and  
researchers The editors have broad experience in translation quality evaluation research including investigations into  
professional practice with qualitative and quantitative studies and the contributors are leading experts in their respective  
fields providing a unique set of complementary perspectives on human and machine translation quality and evaluation  
combining theoretical and applied approaches      **Computer-Assisted Literary Translation** Andrew Rothwell, Andy  
Way, Roy Youdale, 2023-11-30 This collection surveys the state of the art of computer assisted literary translation CALT  
making the case for its potential to enhance literary translation research and practice The volume brings together early  
career and established scholars from around the world in countering prevailing notions around the challenges of effectively  
implementing contemporary CALT applications in literary translation practice which has traditionally followed the model of a  
single translator focused on a single work The book begins by addressing key questions on the definition of literary  
translation examining its sociological dimensions and individual translator perspective Chapters explore the affordances of  
technological advancements and availability of new tools in such areas as post edited machine translation PEMT in expanding  
the boundaries of what we think of when we think of literary translation looking to examples from developments in co  
translation collaborative translation crowd sourced translation and fan translation As the first book of its kind dedicated to  
the contribution CALT in its various forms can add to existing and future scholarship this volume will be of interest to  
students and scholars in Translation Studies especially those working in literary translation machine translation and

translation technologies      *Evaluation of Translation Technology* Walter Daelemans,Véronique Hoste,2010 This collection of scholarly articles asks the question How useful is translation technology Pointing to the need for a widely used and reliable way to test the efficiency of language translation programs the presenters show that commercial tools such as translation memories and translation workbenches are popular and their developers find them useful in terms of productivity consistency or quality However these claims are rarely proven using objective comparative studies and this group describes several new statistical approaches to more rigorous evaluation methods Product Description      **Corpus Linguistics.**

**Volume 2** Anke Lüdeling,Merja Kytö,2009-03-26 This handbook provides an up to date survey of the field of corpus linguistics a field whose methodology has revolutionized much of the empirical work done in most fields of linguistic study over the past decade Corpus linguistics investigates human language by starting out from large collections of texts spoken written or recorded These language corpora which are now regularly available in electronic form are the basis for quantitative and qualitative research on almost any question of linguistic interest Many techniques that are in use in corpus linguistics today are rooted in the tradition of the late 18th and 19th century when linguistics began to make use of mathematical and empirical methods Modern corpus linguistics has used and developed these methods in close connection with computer science and computational linguistics The handbook sketches the history of corpus linguistics shows its potential discusses its problems and describes various methods of collecting annotating and searching corpora as well as processing corpus data It also reports case studies that illustrate the wide range of linguistic research questions addressed in corpus linguistics The over 60 articles included in the handbook are divided into five sections 1 the origins and history of corpus linguistics and surveys of its relationship to central fields of linguistics 2 corpus compilation 3 corpus types 4 preprocessing of corpora 5 the use and exploitation of corpora The final section gives an overview of the results of corpus studies obtained in phonetics phonology morphology syntax semantics sociolinguistics historical linguistics stylometry dialectology and discourse analysis It also reports on recent advances made in human and machine translation contrastive studies computer assisted language learning and automatic summarization The contributors to the volume are internationally known experts in their respective fields The handbook is intended for a wide audience ranging from teachers university students and scholars to anyone interested in the use of computers in linguistic analyses and applications      Natural Language Generation Anja Belz,Roger Evans,Paul Piwek,2004-06-30 This book constitutes the refereed proceedings of the Third International Conference on Natural Language Generation INLG 2004 held in Brockenhurst UK in July 2004 The 18 revised full papers presented together with an invited keynote paper and 4 student papers reporting ongoing PhD research work were carefully reviewed and selected from 46 submissions All current aspects of the generation of natural language are addressed including psychological modeling of human language production as well as computational approaches to the automatic generation of language      *Computational Approaches to Assistive Technologies for People with Disabilities* N.J.

Cercone,K. Naruedomkul,2013-07-16 Assistive technologies have become increasingly important for people with disabilities in recent years This book is the result of over a decade of research into computational approaches to assistive technology Its chapters are based on a number of graduate theses successfully completed over the past dozen or so years under the supervision of Kanlaya Naruedomkul of Mahidol University in Bangkok Thailand and Nick Cercone of York University Toronto Canada Some applications in the chapters use Thai language examples but the techniques employed are not restricted to any single language Each chapter is based on the Ph D work of a former or current student suitably updated and presented for interested readers The book is divided into four sections Following an introduction which includes a review of assistive technology products part two covers applications and includes chapters on alternative sign text MT for language learning lexical simplification using word sense disambiguation and detecting and rating dementia through lexical analysis of spontaneous speech Part three deals with theories and systems and includes granules for learning behavior rough sets methods and applications for medical data and multimedia support systems as assistive technology for hearing impaired students Part four presents a conclusion which includes a look into the future Although this book is not a comprehensive treatise on assistive technology it nevertheless provides a fascinating look at recent research and will be of interest to all those whose work involves the application of assistive technologies for people with disabilities     *Mobile Speech and Advanced Natural Language Solutions* Amy Neustein,Judith A. Markowitz,2013-02-03 Mobile Speech and Advanced Natural Language Solutions presents the discussion of the most recent advances in intelligent human computer interaction including fascinating new study findings on talk in interaction which is the province of conversation analysis a subfield in sociology sociolinguistics a new and emerging area in natural language understanding Editors Amy Neustein and Judith A Markowitz have recruited a talented group of contributors to introduce the next generation natural language technologies for practical speech processing applications that serve the consumer s need for well functioning natural language driven personal assistants and other mobile devices while also addressing business need for better functioning IVR driven call centers that yield a more satisfying experience for the caller This anthology is aimed at two distinct audiences one consisting of speech engineers and system developers the other comprised of linguists and cognitive scientists The text builds on the experience and knowledge of each of these audiences by exposing them to the work of the other     Machine Translation Association for Machine Translation in the Americas.
