

# The Machine Metaphor

- According to Katherine Miller, the Machine Metaphor is central to classical organizations, in terms of management, specialization, standardization, and predictability. The notion, is that we can learn something about how organizations operate by considering a disparate object that an organization resembles.

The Machine as Metaphor and Tool Hermann Haken, Anders Karlqvist, Uno Svedin, 2012-12-06 The chapters in this book centre around one main theme the concept of the machine and its use as metaphor in a variety of contexts. This concept is deeply rooted in western culture and is frequently used to interpret complex systems in nature and society. With the advent of electronic computers the machine metaphor applied to thinking and the brain has become even more pertinent. The idea of a machine has changed over time. In this book these transformations are made transparent. Various aspects of the machine metaphor are discussed and limitations and pitfalls of the metaphor are elaborated. The chapters are written in a non-technical fashion and are accessible to a large readership of scientists and also laymen interested in the scientific perspectives and logical foundations of the machine concept that has been so influential in western thinking. The idea of the book has its origin in a workshop held at the Scientific Station in Abisko Sweden in May 1990 where several of the present authors participated. The meeting was organized and sponsored by the Swedish Council for Planning and Coordination of Research FRN. Since 1983 the FRN has actively promoted a series of such annual events at Abisko all of which have been devoted to the exploration of various aspects of complex systems and their evolution

*Foreign Language Teaching and Learning in Chinese Higher Education: Emerging Challenges* Wei Xu, Wu Ping, Priscilla Roberts, 2025-10-21 The teaching and learning of foreign languages such as English Japanese French Portuguese Arabic etc have become increasingly important in Chinese higher education over the past decade. The application of traditional educational concepts and approaches to the increasingly diverse contexts of foreign language education in the globalized world has created deep seated tensions and challenges for Chinese universities. Research has previously examined the relationship between teaching methods and student performance as well as the impact of globalization on foreign language pedagogy in China. As part of the development of foreign language education a variety of educational settings have faced culturally specific challenges. These challenges include the need to adapt to evolving technologies the changing needs of learners and the changing demands of the job market etc. China's large population and diverse culture have necessitated the development of effective teaching methods and materials for foreign language instruction
