Nobel Economists:

Lives of the Laureates, sixth edition Roger W. Spencer, David A. Macpherson, 2014-11-28 Autobiographical accounts by Nobel laureates reflect the richness and diversity of contemporary economic thought and offer insights into the creative process. *Lives of the Laureates* offers readers an informal history of modern economic thought as told through autobiographical essays by twenty three Nobel Prize laureates in Economics. The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity. The accounts are accessible and engaging, achieving clarity without sacrificing inherently difficult content. This sixth edition adds four recent Nobelists to its pages: Eric Maskin who illustrates his explanation of mechanism design with an example involving a mother, a cake and two children; Joseph Stiglitz who recounts his field's ideological wars linked to policy disputes; Paul Krugman who describes the insights he gained from studying the model of the Capitol Hill Babysitting Coop and the recession it suffered when more people wanted to accumulate babysitting coupons than redeem them; and Peter Diamond who maps his development from student to teacher to policy analyst. *Lives of the Laureates* grows out of a continuing lecture series at Trinity University in San Antonio which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms. These lectures demonstrate the richness and diversity of contemporary economic thought. The reader will find that paths cross in unexpected ways that disparate thinkers were often influenced by the same teachers and that luck as well as hard work plays a role in the process of scientific discovery. The Laureates: Lawrence R Klein, Kenneth J Arrow, Paul A Samuelson, Milton Friedman, George J Stigler, James Tobin, Franco Modigliani, James M Buchanan, Robert M Solow, William F Sharpe, Douglass C North, Myron S Scholes, Gary S Becker, Robert E Lucas Jr, James J Heckman, Vernon L Smith, Edward C Prescott, Thomas C Schelling, Edmund S Phelps, Eric S Maskin, Joseph E Stiglitz, Paul Krugman, Peter A Diamond.

The Nobel Memorial Laureates in Economics Howard R. Vane, Chris Mulhearn, 2005 this book will continue to share shelf space next to my current textbooks. As a librarian such utility makes this a desirable addition to any educator's collection. As a history of economic thought book Vane and Mulhearn have brought together a breadth of information that can be found through disparate sources but at a cost of effort and especially for students qualitative decisions regarding sources. The convenience of their starting methodology breadth over depth coverage and clear intention of writing to an audience of students makes this a useful text. Kirk Douglas Johnson Journal of the History of Economic Thought. The essays summarizing the main achievements of the prize winners are well written and to the point. They are short enough that they never cause the reader to lose interest but substantive enough to let you know what the winners' accomplishments amount to. These compact factually accurate essays mark the real value of the book as a reference work: there is little for which to fault the authors. Vane and Mulhearn have done a very nice job with the book and it is an added bonus that it includes a formal portrait photograph of each prize winner. Bradley W. Nobel Laureates take readers on a tour of some of the everyday issues that can be explored using basic economic principles. Topics include how economic tools can be used to rebuild nations in the aftermath of a war, financing retirement as longevity increases and what governments should really be doing to boost the economy.

Intellectual Capital Tom Karien, 2010-08-30 There is arguably no award more recognized in the academic and professional worlds than the Nobel Prize. The public pays attention to the prizes in the fields of economics, literature and peace because their recipients are identified with particular ideas, concepts or actions that often resonate with or sometimes surprise a global audience. The Nobel Prize in Economic Science, established by the Bank of Sweden in 1969, has been granted to 64 individuals. Thomas Karien explores the core ideas of the economic theorists whose work led to their being awarded the Nobel in its first forty years. He also discusses the assumptions and values that underlie their economic theories, revealing different and controversial features of the content and methods of the discipline. The Nobelists include Keynesians, monetarists, financial economists, behaviorists, historians, statisticians, mathematicians, game theorists and other innovators.
