Noble Experiment:

They Never Said It : A Book of Fake Quotes, Misquotes, and Misleading Attributions Paul F. Boller Jr. Emeritus Professor of History Texas Christian University, Oklahoma John George Jr. Professor of Political Science and Sociology Central State University, 1989-05-18 Abraham Lincoln never said You cannot fool all the people all the time Thomas Jefferson never said That government is best which governs least And Horace Greeley never said Go west young man In They Never Said It Paul Boller Jr and John George examine hundreds of misquotations incorrect attributions and blatant fabrications outlining the origins of the quotes and revealing why they should be consigned to the historical trashcan Many of the misquotes are quite harmless Some are inadvertent misquotes that have become popular Shakespeare actually said The best part of valor is discretion others the inventions of reporters embellishing a story Franklin Roosevelt never opened a speech to a DAR group with the salutation My fellow immigrants But some of the quotes such as Charles Darwin s supposed deathbed recantation of evolution are blatantly dishonest and falsify the historical record And others are chillingly vicious filled with virulent racial and religious prejudices that completely distort the views of the person supposedly quoted and spread distrust and hatred among the gullible These include the forged remarks attributed to Benjamin Franklin that Jews should be excluded from America and the fabricated condemnation of Catholics attributed to Lincoln An entertaining and yet thought provoking book They Never Said It sorts out a great deal of history and sets it right going beyond a mere catalog of popular misconceptions to reveal how conservatives and liberals atheists and evangelists all have at times twisted and even invented the words of eminent figures to promote their own ends It is the ultimate debunking reference a perfect complement to handbooks of quotations

In Their Own Words Fred Erisman, 2021-01-15 Amelia Earhart s prominence in American aviation during the 1930s obscures a crucial point she was but one of a closely knit community of women pilots Although the women were well known in the profession and widely publicized in the press at the time they are largely overlooked today Like Earhart they wrote extensively about aviation and women s causes producing an absorbing record of the life of women fliers during the emergence and peak of the Golden Age of Aviation 1925 1940 Earhart

and her contemporaries however were only the most recent in a long line of women pilots whose activities reached back to the earliest days of aviation. These women too wrote about aviation speaking out for new and progressive technology and its potential for the advancement of the status of women. With those of their more recent counterparts their writings form a long sustained text that documents the maturation of the airplane aviation and women's growing desire for equality in American society. In *Their Own Words* takes up the writings of eight women pilots as evidence of the ties between the growth of American aviation and the changing role of women. Harriet Quimby 1875-1912, Ruth Law 1887-1970 and the sisters Katherine and Marjorie Stinson 1893-1977, 1896-1975 came to prominence in the years between the Wright brothers and World War I. Earhart 1897-1937, Louise Thaden 1905-1979 and Ruth Nichols 1901-1960 were the voices of women in aviation during the Golden Age of Aviation. Anne Morrow Lindbergh 1906-2001 the only one of the eight who legitimately can be called an artist bridges the time from her husband's 1927 flight through the World War II years and the coming of the Space Age. Each of them confronts issues relating to the developing technology and possibilities of aviation. Each speaks to the importance of assimilating aviation into daily life. Each details the part that women might and should play in advancing aviation. Each talks about how aviation may enhance women's participation in contemporary American society making their works significant documents in the history of American culture.

Time Britton Hadden, Henry Robinson Luce, 1928 *The Prohibition Amendment* United States. Congress. House. Committee on the Judiciary, 1930 *President Herbert Hoover* Donald W. Whisenhunt, 2007 Herbert Clark Hoover 10 August 1874-20 October 1964 the 31st President of the United States 1929-1933 was a successful mining engineer, the people's icon and administrator. He showed the Efficiency Movement component of the Progressive Era, arguing there were other solutions to all social and economic problems, a position that was challenged by the Great Depression that began while he was President. Hoover had a distinguished public service career before becoming president at a time of great religious and social turmoil. He had the misfortune to arrive at the presidency at the same time as the Stock Market Crash of 1929 and the outset of the Great Depression and his legacy to this day carries that stigma. He nevertheless is generally ranked in the middle of the pack of effective presidents.

The Christian Century, 1930 **The American Issue**, 1929 New Relativity in the Gravitational Universe C. S. Unnikrishnan, 2022-11-04 Our vast Universe is filled with an enormous amount of matter and energy which are the source of large gravitational potentials affecting all physical phenomena. Because this fact about the size and contents of the Universe was not known when our fundamental theories of dynamics and relativity were completed by the 1920s, the current theories based as they are in empty space fail to incorporate cosmic gravity. Though the current theories are consistent with the majority of empirical facts, there are some crucial discrepancies which demand a drastic shift to a cosmic gravitational paradigm for the theories of relativity and dynamics. The book is a detailed and widely accessible account of this paradigm called Cosmic Relativity supported by ample empirical evidence. It is established that all motional relativistic effects are cosmic gravitational effects. The new theory of
