Non Linguistic Philosophy:

Non-linguistic Philosophy Alfred Cyril Ewing, 1960 **Non-linguistic Philosophy** A. C. Ewing, 2002 This volume is a comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed versions and its theatrical productions. Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play. The issues discussed include gender authority, female autonomy and unruliness, courtship and marriage, language and speech, and performance and theatricality.

Non-Linguistic Philosophy A. C. Ewing, 2015-02-05 First published in 2002, Routledge is an imprint of Taylor & Francis, an information company.

Essays in Non-linguistic Philosophy Alfred Cyril Ewing, 1968 **British Ethical Theorists from Sidgwick to Ewing** Thomas Hurka, 2014-11-06 Thomas Hurka presents the first full historical study of an important strand in the development of modern moral philosophy. His subject is a series of British ethical theorists from the late nineteenth century to the mid twentieth century who shared key assumptions that made them a unified and distinctive school. The best known of them are Henry Sidgwick, G. E. Moore, and W. D. Ross; others include Hastings Rashdall, H. A. Prichard, C. D. Broad, and A. C. Ewing. They disagreed on some important topics, especially in normative ethics. Thus, some were consequentialists and others deontologists. Sidgwick thought only pleasure is good, while others emphasized perfectionist goods such as knowledge, aesthetic appreciation, and virtue. But all were non-naturalists and intuitionists in metaethics, holding that moral judgements can be objectively true, have a distinctive subject matter, and are known by direct insight. They also had similar views about how ethical theory should proceed and what are relevant arguments in it. Their disagreements therefore took place on common ground. Hurka recovers the history of this underappreciated group by showing what its members thought, how they influenced each other, and how their ideas changed through time. He also identifies the shared assumptions that made their school unified and distinctive and assesses their contributions critically, both when they debated each other and when they agreed. One of his themes is that their general approach to ethics was more fruitful philosophically than many better known ones of both earlier and later times.

The Journal of Philosophy, 1928 Covers topics in philosophy, psychology, and scientific methods. Vols. 31 include a Bibliography of philosophy, 1933.

Thinking Without Words Jose Luis Bermudez, 2003-03-27 *Thinking without Words* provides a challenging new theory of the nature of non-linguistic thought. Many scientific disciplines treat non-linguistic creatures as thinkers, explaining their behavior in terms of their thoughts about themselves and about the environment. But this theorizing has proceeded without any clear account of the types of thinking available to non-linguistic creatures. One consequence of this is that ascriptions of thoughts to non-linguistic creatures have frequently been held to be metaphorical and not to be taken at face value. Bermudez offers a conceptual framework for treating human infants and non-human animals as genuine thinkers. Whereas existing discussions of thought at the non-linguistic level have concentrated on how such thoughts might be physically realized, Bermudez approaches the

problem by considering what is required in explaining behavior in psychological terms In developing a positive account of non linguistic thought he shows how the experimental tools used by developmental psychologists and students of animal behavior can be used to give a precise account of the way in which a human infant or non human animal is representing the world Much of the book is devoted to exploring the differences between thinking without words and language based thinking Bermudez argues that there are clear limits to the expressive power of non linguistic thought Nonetheless he identifies primitive analogues at the non linguistic level that can be used to explain sophisticated non linguistic behaviors Thinking Without Words is the first full length philosophical study of this important topic It is written with an interdisciplinary readership in mind and will appeal to philosophers psychologists and students of animal behavior **The Australasian Journal of Psychology and Philosophy** ,1927 **A Critique of Linguistic Philosophy with Second Thoughts** C. W. K. Mundle,1979 Professor Mundle s authoritative and acclaimed critique of a way of thinking which still shapes the style of Anglo Saxon philosophy is here presented in a revised text with a new postscript Mundle shows how Austin Ryle and Wittgenstein among others not only committed grammatical and logical errors akin to those they themselves detected in others but misunderstood the relations between grammar and philosophy Professor P L Heath contributes a new foreword and Mundle himself answers his opponents in a subtly provocative manner **Bulletin** Östasiatiska museet,2000 **John Wisdom's Psychoanalytical Model of Philosophy** John Arden Hunter,1971 Philosophy and Psychology Pamphlets ,1927 **The Philosophy of Wittgenstein: Method and essence** John V. Canfield,1986 *Australasian Journal of Philosophy* ,1927 **Linguistics, Language, and Religion** David Crystal,1965 The relatively new science of linguistics which is concerned with the development and changes in speech and language studies such problems as definition ambiguity vernaculars liturgical usage and Biblical translations The author here provides a useful and fascinating introduction to this new science He shows how linguistics provides new insights and facts concerning the religious heritage of mankind The major part of the book is concerned with the specifically religious implications that arise from a knowledge of linguistics Here questions of interpretation Biblical exegesis and translation are all studied in depth *Husserl's Phenomenology* Jitendra Nath Mohanty,William R. McKenna,1989 **Boston Studies in the Philosophy of Science** ,2000 **The Language of Philosophy** Margaret Chatterjee,1981-09-30 *Language* ,1929 Proceedings of the annual meeting of the Society in v 1 11 1925 34 After 1934 they appear in Its Bulletin The Varieties of Understanding: Introduction.
