Non Monotonic Reasoning And Partial Semantics:

Non-monotonic Reasoning and Partial Semantics Wiebe Hoek, Wiebe van der Hoek, 1992 Stressing partial and multiple valued approaches to non monotonic logic this volume demonstrates how major problems can be overcome It proposes a simple modal framework in which non monotonic reasoning is captured in a dynamic setting Explanatory Nonmonotonic Reasoning Alexander Bochman, 2005 Many approaches in the field of nonmonotonic and commonsense reasoning are actually different representations of the same basic ideas and constructions This book gives a logical formalization of the original explanatory approach to nonmonotonic reasoning It uses the basic formalism of biconsequence relations as well as derived systems of default autoepistemic and causal inference to cover in a single framework such diverse systems as default logic autoepistemic and modal nonmonotonic logics input output and causal logics argumentation theory and semantics of general logic programs with negation as failure This approach provides a clear separation between logical monotonic and nonmonotonic aspects of nonmonotonic reasoning The separation allows in particular to single out the logics underlying modern logic programming and restore thereby the connection between logic programming and logic **Non-monotonic Reasoning** Yao Hua Tan, 1992 Explanatory Nonmonotonic Reasoning Alexander Bochman, 2005 Many approaches in the field of nonmonotonic and commonsense reasoning are actually different representations of the same basic ideas and constructions This book gives a logical formalization of the original explanatory approach to nonmonotonic reasoning It uses the basic formalism of biconsequence relations as well as derived systems of default autoepistemic and causal inference to cover in a single framework such diverse systems as default logic autoepistemic and modal nonmonotonic logics input output and causal logics argumentation theory and semantics of general logic programs with negation as failure This approach provides a clear separation between logical monotonic and nonmonotonic aspects of nonmonotonic reasoning The separation allows in particular to single out the logics underlying modern logic programming and restore thereby the connection between logic programming and logic **Logic Programming and Non-monotonic Reasoning**, 2001 **Modalities for Reasoning about Knowledge and Quantities** Wiebe van der Hoek, 1992 Journal of Applied Non-classical Logics, 1997
