Noninvasive Bone Measurements Methodological Problems:

Osteoporosis United States. Congress. Senate. Committee on Labor and Human Resources. Subcommittee on Aging, 1985 **The Climacteric: An Update** H. van Herendaal, B. van Herendaal, F.E. Riphagen, L. Goessens, H. van der Plas, 2012-12-06 THE JAN PALFIJN SYMPOSIA In 1979 the Department of Obstetrics and Gynaecology of the Jan Palfijn Hospital in Merksem Antwerp celebrated its 25th Anniversary To mark the occasion the first symposium was organized the theme chosen being hysteroscopy Thanks to the cooperation of specialists from both within and outside Belgium the event attracted such a large attendance that it was decided to follow up this first venture with others In the light of the experience gained from the first symposium we established the Jan Palfijn Foundation for Gynaecological and Obstetrical Didactics the reasons for this being budgetary and in particular organizational This approach made it possible to attract the cooperation of enthusiastic fellow workers from outside the hospital on a permanent or ad hoc basis and hence to reach a much wider group of experts in all fields both at home and abroad In 1981 the second symposium was held at the Jan Palfijn Hospital the topic being echography in obstetrics and gynaecology Almost all of the Belgian universities were represented and papers were presented by confreres from practically all of the EEC countries When the third symposium was held in 1982 again on hysteroscopy the speakers and audience could literally hardly be squeezed into the Jan Palfijn Hospital's facilities The fourth symposium was accordingly organized in the modern luxurious facilities of the new administration building of the Antwerp Provincial Authority *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 Osteoporosis Clifford J. Rosen, 2012-12-06 LA WRENCE G RAISZ MD Division of Endocrinology and Metabolism University of Connecticut Health Center Farmington CT The rapid transfer of new knowledge concerning the pathogenesis diagnosis prevention and treatment of disease into clinical practice has always been a major challenge in medicine This challenge is particularly difficult to meet in osteoporosis not only because there has been so much new knowledge generated in recent years but also because this disorder has not caught the attention of many practicing physicians The goal of this volume is to help primary care physicians develop a better understanding of osteoporosis and a more effective approach to diagnosis prevention and treatment As primary care physicians become more and more responsible for the maintenance of health and the prevention of disease osteoporosis must become one of their important concerns The magnitude of the problem of osteoporosis has been widely publicized Within the next 30 years the cost of hip fractures alone is expected to exceed 40 billion a year in the United States and will be a major cause of increased mortality In addition vertebral crush fractures will cripple more and more of our elderly population both men and women This enormous toll is not inevitable Current methods of identifying individuals at risk and applying preventive programs could reduce the incidence of fractures by 50% or more This should be the minimum goal of clinicians National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1986 *Body Composition Measurements in Infants and Children*, 1989 The purpose of this
