Advanced Topics in Control Systems Theory Fran oise Lamnabhi-Lagarrigue,2005-02-11 Advanced Topics in Control Systems Theory contains selected contributions written by lecturers at the second annual Formation d Automatique de Paris FAP Graduate Control School in Paris It is addressed to graduate students and researchers in control theory with topics touching on a variety of areas of interest to the control community such as cascaded systems flatness optimal control and Hamiltonian and infinite dimensional systems The reader is provided with a well integrated synthesis of the latest thinking in these subjects without the need for an exhaustive literature review The internationally known contributors to this volume represent many of the most reputable control centers in Europe Advanced Topics in Control Systems Theory can be used to support either a one term general advanced course on nonlinear control theory devoting a few lectures to each chapter or for more focused and intensive courses at graduate level The book's concise but pedagogical manner will give an ideal start to researchers wishing to broaden their knowledge in aspects of modern control theory outside their own expertise

*Identification of Nonlinear Systems Using Neural Networks and Polynomial Models* Andrzej Janczak,2004-11-18 This monograph systematically presents the existing identification methods of nonlinear systems using the block oriented approach It surveys various known approaches to the identification of Wiener and Hammerstein systems which are applicable to both neural network and polynomial models The book gives a comparative study of their gradient approximation accuracy computational complexity and convergence rates and furthermore presents some new and original methods concerning the model parameter adjusting with gradient based techniques Identification of Nonlinear Systems Using Neural Networks and Polynomial Models is useful for researchers engineers and graduate students in nonlinear systems and neural network theory

**Switched and Impulsive Systems** Zhengguo Li,Yengchai Soh,Changyun Wen,2005-02-16 In this volume the important concept of switched and impulsive control is discussed with a wide field of applications in the analysis and

control of complex systems This monograph provides the reader with a comprehensive coverage of switched and impulsive systems including new original work with various applications such as switched server systems scalable video coding systems chaotic based secure communication or quality of service on the internet Switched and Impulsive Systems can be used as a reference or a text for a course at graduate level

Theory of the Non-linear Analog Phase Locked Loop Nikolaos I. Margaris,2004-05-18 This book develops for the first time a complete and connected nonlinear theory for the analog Phase Locked Loop PLL which clarifies the obscure points of its complex non linear behaviour The book suggests new non linear models for the PLL components and applies the averaging method to analyse PLL The book presents the physical interpretation of the PLL operation locates the difficulties presented by its operation and suggests solutions to overcome these problems Finally it provides closed form expressions for all the important measures of the PLL and proposes new design criteria

**Advances in Rehabilitation Robotics** Z. Zenn Bien,Dimitar Stefanov,2004-06-24 One of the major

application targets of service robots is to use them as assistive devices for rehabilitation This book introduces some latest achievements in the field of rehabilitation robotics and assistive technology for people with disabilities and aged people The book contains results from both theoretical and experimental works and reviews on some new advanced rehabilitation devices which has been recently transferred to the industry Significant parts of the book are devoted to the assessment of new rehabilitation technologies the evaluation of prototype devices with end users the safety of rehabilitation robots and robot assisted neurorehabilitation The book is a representative selection of the latest trends in rehabilitation robotics and can be used as a reference for teaching on mechatronic devices for rehabilitation

**Hybrid Estimation of Complex Systems**

Michael W. Hofbaur,2005-06-09 This monograph provides a tool set for hybrid estimation that can successfully monitor the behavior of complex artifacts with a large number of possible operational and failure modes such as production plants automotive or aeronautic systems and autonomous robots For this purpose ideas from the fields of System Theory and Artificial Intelligence are taken and hybrid estimation is reformulated as a search problem This allows to focus the estimation onto highly probably operational modes without missing symptoms that might be hidden among the noise in the system Additionally a novel approach to continue hybrid estimation in the presence of unknown behavioral modes and to automate system analysis and synthesis tasks for on line operation are presented This leads to a flexible model based hybrid estimation scheme for complex artifacts that robustly copes with unforeseen situations

*Nonlinear Control Systems* Alberto Isidori,2013-04-17

The purpose of this book is to present a self contained description of the fundamentals of the theory of nonlinear control systems with special emphasis on the differential geometric approach The book is intended as a graduate text as well as a reference to scientists and engineers involved in the analysis and design of feedback systems The first version of this book was written in 1983 while I was teaching at the Department of Systems Science and Mathematics at Washington University in St Louis This new edition integrates my subsequent teaching experience gained at the University of Illinois in Urbana Champaign in 1987 at the Carl Craz Gesellschaft in Oberpfaffenhofen in 1987 at the University of California in Berkeley in 1988 In addition to a major rearrangement of the last two Chapters of the first version this new edition incorporates two additional Chapters at a more elementary level and an exposition of some relevant research findings which have occurred since 1985
