Birna van Riemsdijk, Amit K. Chopra,2014-06-03 This book constitutes the thoroughly refereed proceedings of the 9th International Workshops on Coordination Organizations Institutions and Norms in Agent Systems COIN 2013 The workshops were co located with AAMAS 2013 held in St Paul MN USA in May 2013 and with PRIMA 2013 held in Dunedin New Zealand in December 2013 The 18 full papers were carefully reviewed and selected from 28 submissions and are presented together with two invited papers The papers are organized in topical sections such as coordination organizations institutions norms norm conflict and norm aware agents **Explanation in Action Theory and Historiography** Gunnar Schumann,2019-05-29 Is the appropriate form of human action explanation causal or rather teleological While this is a central question in analytic philosophy of action it also has implications for questions about the differences between methods of explanation in the sciences on the one hand and in the humanities and the social sciences on the other Additionally this question bears on the problem of the appropriate form of explanations of past human actions and therefore it is prominently discussed by analytic philosophers of historiography This volume brings together causalists and anti causalists to address enduring philosophical questions at the heart of this debate as well as their implications for the practice of historiography Part I considers the quarrel between causalism and anti causalism in recent developments in the philosophy of action Part II presents papers by causalists and anti causalists that are more narrowly focused on the philosophy of historiography **Self-Adaptive Software** Robert Laddaga, Paul Robertson, Howie Shrobe,2003-08-03 The 18 revised full papers presented in this book together with an introductory survey were carefully reviewed and constitute the documentation of the Second International Workshop on Self adaptive Software IWSAS 2001 held in Balatonf red Hungary in May 2001 Self adaptive software evaluates its own behavior and changes it when the evaluation indicates that the software does not accomplish what it is intended to do or when better functionality or better performance is possible The self adaptive approach in software engineering builds on well known dynamic features familiar to Lisp or Java programmes and aims at improving the robustness of software systems by gradually adding new features of self adaption or autonomy **Conceptions Contemporaines Du Droit** ,1982 The American Ecclesiastical Review Herman Joseph Heuser,1941 Sociology of Law as the Science of Norms Håkan Hydén,2021-12-28 This book proposes the study of norms as a method of explaining human choice and behaviour by introducing a new scientific perspective The science of norms may here be broadly understood as a social science which includes elements from both the behavioural and legal sciences It is given that a science of norms is not normative in the sense of prescribing what is right or wrong in various

situations Compared with legal science sociology of law has an interest in the operational side of legal rules and regulation This book develops a synthesizing social science approach to better understand societal development in the wake of the increasingly significant digital technology The underlying idea is that norms as expectations today are not primarily related to social expectations emanating from human interactions but come from systems that mankind has created for fulfilling its needs Today the economy via the market and technology via digitization generate stronger and more frequent expectations than the social system By expanding the sociological understanding of norms the book makes comparisons between different parts of society possible and creates a more holistic understanding of contemporary society The book will be of interest to academics and researchers in the areas of sociology of law legal theory philosophy of law sociology and social psychology
