North African Victory:

North African Victory Adrian Stewart, 2002 Published in hardback as *The Eighth Army's Greatest Victories* this informed and accessible account of victory in the desert examines the considerable problems faced and overcome by the commanders and men of the eighth army Whereas the early successes of the axis powers in North Africa have been loudly praised the far more conclusive victories of the allies from August 1942 to May 1943 have received little credit Additional information is offered on the highly significant battle of Alam Halfa the reasons for the escape of the bulk of Rommel's defeated forces after El Alamein the contribution of the desert air force and the co-operation of the eighth army and its all too often ignored partner the desert air force

The North African Campaign of World War II Charles River Charles River Editors, 2017-09-12 Includes pictures Includes contemporary accounts of the fighting Includes online resources and a bibliography for further reading It may almost be said Before Alamein we never had a victory After Alamein we never had a defeat Winston Churchill The fighting in North Africa during World War II is commonly overlooked aside from the famous battle at El Alamein that pitted the British under General Bernard Montgomery against the legendary Desert Fox Erwin Rommel But while the Second Battle of El Alamein would be the pivotal action in North Africa the conflict in North Africa began all the way back in the summer of 1940 when Italian dictator Benito Mussolini declared Italy's entrance into the war From his perspective the fact that the British and French had their hands full with the Germans created an opportunity for Italy to enlarge its colonial holdings in Africa by seizing portions of the British Empire However British troops in the colony of Egypt responded to Italy's declaration of war by driving through the Egyptian Ethiopian border and attacking Italian troops stationed in the Italian colony of Ethiopia By September 13 1940 Italian commanders in Ethiopia were finally ready to put Mussolini's plan into action and attack British colonial holdings but British troops had already attacked a series of Italian frontier posts and had inflicted 3 500 casualties among Italy's North African troops Although British maneuvering in North Africa began successfully against the Italians the British forces suffered a series of defeats over the next two years due to several problems the British army faced as a result of inadequate preparation and weaponry For example when the war began junior officers were unprepared for the kind of cooperation between units that was necessary in the battles of North Africa At the same time while British tanks were capable of opposing Italian tanks they were vastly inferior to German models Dealing with the Italians was one thing but the British faced an entirely different monster in North Africa when Erwin Rommel a German general who had gained much fame for his role in the invasions of Poland and France was sent to North Africa in February 1941 Rommel's directives from the German headquarters were to maneuver in a way that would allow him to hide the fact that his ultimate goal was the capture of Cairo and the Suez Canal The ultimate plan was that Rommel would not reveal the Germans' true intentions in North Africa until after the Germans had made headway in their invasion of the Soviet Union The Second Battle of El Alamein was a turning point in the campaign While the scale of the battle paled in

comparison to the battles of the Eastern Front where the majority of German troops were concentrated it still marked an important victory in World War II especially from the British perspective The British who had suffered through three years of war in which they seemed to teeter on the brink of defeat were able to hang their hats on the victory reviving the nation's morale and reaffirming its military might Over the next few weeks the Allies made steady progress and forced Rommel to conduct a fighting retreat to safety until his army linked up with another Axis army in Tunisia but the fighting at the end of 1942 inevitably compelled all Axis forces to quit the theater the first time since the beginning of the war that Africa was safe for the Allies The North African Campaign of World War II The History and Legacy of the Decisive Allied Victory in North Africa examines one of the most important campaigns of the war Along with pictures depicting important people places and events you will learn about the North African campaign like never before Discarded Victory - North Africa, 1940-1941 Dennis H. Thompson,2014-08-15 The Anglo Italian campaign of 1940-41 resulted in one of the most lopsided operational victories of the entire Second World War Strategic misjudgement at the highest levels of British political and military leadership would discard the opportunities won by its fighting forces in North Africa and commit them to a catastrophic intervention in Greece In 1940 Italy fielded a numerically overwhelming but technologically deficient conscript military force on the continent of Africa Italy's political leaders expected her 500 000 strong North African army to quickly defeat the British troops stationed in the theater of operation The British forces though inferior in numbers were well trained regulars who possessed more superior weaponry than their Italian foes In the brief high intensity conflict waged in the North African deserts from December 1940 to February 1941 the British would annihilate an Italian army of 130 000 soldiers On the verge of complete victory in the North African theater the British would commit an act of extraordinary strategic misjudgement and divert their efforts to Greece in order to engage the Axis forces on the continent of Europe The discarded early victory in North Africa would lead Britain to catastrophe in Greece cost them the initiative in the war and nearly led to their defeat in North Africa Discarded Victory - North Africa, 1940-1941 ,2002 The Anglo Italian campaign of 1940-41 resulted in one of the most lopsided operational victories of the entire Second World War **Patton's First Victory** Leo Barron,2024-02-16 American troops invaded North Africa in November 1942 but did not face serious resistance until their defeat at Kasserine Pass After this disaster Gen George Patton took command and at El Guettar Patton's men defeated the Germans It was the first victory of Patton's storied World War II career and proved that the U.S. Army could win Discarded Victory North Africa, 1940-1941 U. S. Army U.S. Army War College,2016-04-07 The Anglo Italian campaign of 1940-41 resulted in one of the most lopsided operational victories of the entire Second World War Strategic misjudgment at the highest levels of British political and military leadership would discard the opportunities won by its fighting forces in North Africa and commit them to a catastrophic intervention in Greece In 1940 Italy fielded a numerically overwhelming but technologically deficient conscript military force on the continent of Africa Italy's political leaders expected her 500 000 strong North African army to

quickly defeat the 50 000 British troops stationed in the theater of operation. The British forces though inferior in numbers were well trained regulars who possessed more superior weaponry than their Italian foes. In the brief high intensity conflict waged in the North African deserts from December 1940 to February 1941 the British would annihilate an Italian army of 130 000 soldiers. On the verge of complete victory in the North African theater the British would commit an act of extraordinary strategic misjudgment and divert their efforts to Greece in order to engage the Axis forces on the continent of Europe. The discarded early victory in North Africa would lead Britain to catastrophe in Greece cost them the initiative in the war and nearly lead to their defeat in North Africa.

Torch Vincent O'Hara, 2015-09-15 World War II had many superlatives but none like Operation Torch a series of simultaneous amphibious landings audacious commando and paratroop assaults and the Atlantic's biggest naval battle fought across a two thousand mile span of coastline in French North Africa. The risk was enormous the scale breathtaking the preparations rushed the training inadequate and the ramifications profound. Torch was the first combined Allied offensive and key to how the Second World War unfolded politically and militarily. Nonetheless historians have treated the subject lightly perhaps because of its many ambiguities. As a surprise invasion of a neutral nation it recalled German attacks against countries like Belgium Norway and Yugoslavia. The operation's rationale was to aid Russia but did not do this. It was supposed to get American troops into the fight against Germany but did so only because it failed to achieve its short term military goals. There is still debate whether Torch advanced the fight against the Axis or was a wasteful dispersion of Allied strength and actually prolonged the war.

Torch North Africa and the Allied Path to Victory is a fresh look at this complex and controversial operation. The book covers the fierce Anglo American dispute about the operation and charts how it fits into the evolution of amphibious warfare. It recounts the story of the fighting focusing on the five landings: Port Lyautey, Fdala and Safi in Morocco and Oran and Algiers in Algeria and includes air and ground actions from the initial assault to the repulse of Allied forces on the outskirts of Tunis. Torch also considers the operation's context within the larger war and it incorporates the French perspective better than any English language work on the subject. It shows how Torch brought France as a power back into the Allied camp how it forced the English and the Americans to work together as true coalition partners and forge a coherent amphibious doctrine. These skills were then applied to subsequent operations in the Mediterranean in the English Channel and in the Pacific. The story of how this was accomplished is the story of how the Allies brought their power to bear on the enemy's continental base and won World War II.

The Extinction of the Christian Churches in North Africa Leonard Ralph Holme, 1898

The United States and the Origins of the Cold War, 1941-1947 John Lewis Gaddis, 2000. This book moves beyond the focus on economic considerations that was central to the work of New Left historians examining the many other forces: domestic politics bureaucratic inertia quirks of personality and perceptions of Soviet intentions that influenced key decision makers in Washington.
