

THE IRON DREAM

Oregons Iron Dream

Diane F. Britton

Oregons Iron Dream:

Oregon's Iron Dream; a Story of Old Oswego... Mary Goodall, *An Index to Oregon's Iron Dream* Mary Goodall, 1958

Oregon's Iron Dream Mary Goodall, 1958 *An Environmental History of the Willamette Valley* Elizabeth Orr, William

Orr, 2019-03-25 Western Oregon's Willamette Basin once a vast wilderness became a thriving community almost overnight. When Oregon territory was opened for homesteading in the early 1800s most of the intrepid pioneers settled in the valley, spurring rapid changes in the landscape. Heralded as fertile with a mild climate and an abundance of natural resources, the valley enticed farmers, miners, and loggers who were quickly followed by the construction of rail lines and roads. Dams were built to harness the once free flowing Willamette River and provide power to the growing population. As cities rose, people like Portland architect Edward Bennett and conservationist governor Tom McCall worked to contain urban sprawl. Authors Elizabeth and William Orr bring to life the changes that sculpted Oregon's beloved Willamette Valley.

The Oregon

Companion Richard H. Engeman, 2009-09-01 What's the connection between Ken Kesey and Nancy's Yogurt? How about the difference between a hoedad and a webfoot? What became of the Pixie Kitchen and the vanished Lambert Gardens? The Oregon Companion is an A-Z handbook of over 1000 people, places, and things. From Abernethy and beaver money to houseboats, railroads, and the Zigzag River, an intrepid public historian separates fact from fiction with his sense of humor. Intact entries include towns and cities, counties, rivers, lakes, and mountains, people who have left a mark on Oregon industries, products, crops, and natural resources. Includes more than 160 historical black and white photos. This entertaining and delightfully meticulous compendium is an essential reference for anyone curious about Oregon.

The Iron and Steel

Industry in the Far West Diane F. Britton, 1991 Irondale, a quiet residential community ten miles south of Port Townsend on the northeast corner of Washington's Olympic Peninsula, was once home to a major West Coast iron and steel industry that lasted from 1881 to 1919. In its heyday, especially 1909-1911, the town was a bustling commercial hub with daily ocean steamer traffic arriving and departing, carrying hundreds of passengers and tons of cargo raw materials and finished products. Though Irondale's future seemed promising in true boomtown fashion, the town and its industry prospered and declined together. Irondale's turbulent history reflects conditions faced by western entrepreneurs, including stiff competition from established eastern cities. The striving for financial profit and for a self-sufficient economy free from eastern domination encouraged speculation and boosterism, a theme found commonly throughout U.S. history. Western growth during the late nineteenth and early twentieth century spurred a greater demand for iron and steel materials, used not only in household farming implements but also necessary for all types of structures and transportation facilities, particularly railroads. Diane Britton's impressively researched work greatly advances an understanding of community and industry building in the West. It provides the first narrative account of the rise and eventual demise of an integrated steelworks at Irondale, examines the intimate relationship between the town and plant and places that local history into a larger regional and national context.
