explain why the trope has exercised such enduring power and what role it plays in the larger symbolic geography that structures Russian literature's representation of the nation's space. Using a comparative approach, she brings to light fundamental questions that have long gone unasked: how to understand, for instance, the weakness of literary regionalism in a country as large as Russia. Why the insistence from Herzen through Chekhov and beyond that all Russian towns look the same? In a literary tradition that constantly compared itself to a western European standard, Lounsbury argues, the problem of provinciality always implied difficult questions about the symbolic geography of the nation as a whole. This constant awareness of a far off European model helps explain why the provinces in all their supposed drabness and predictability are a topic of such fascination for Russian writers: why these anonymous places are in effect so important and meaningful notwithstanding the culture's nearly unremitting emphasis on their nullity and meaninglessness. The Tradition of the Gospel Christians Andrey Puzynin, 2011-01-01

The Tradition of the Gospel Christians explores the post-Soviet tradition of evangelical Christians originating from the ministry of the Victorian revivalist preacher Lord Radstock in St. Petersburg in the 1870s. In an effort to resolve the current evangelical crises of theology and identity, this study provides an analysis of the tradition's history, reflecting on its restorationist tradition, the contours and vectors of its theology, and its practice of biblical interpretation. The historical analysis reveals that the major causes of the crises of identity and theology pertain to the socio-political upheavals which, in turn, led the tradition to develop strategies to maintain relevance in its changed contexts. The socio-political shifts were also responsible for the lack of emphasis on research and scholarship, which contributed to a difficulty in finding the necessary resources and intellectual virtues to deal with the collapse of the Soviet Union. Building on the discoveries of the historical analysis, Andrey P. Puzynin offers a new historical and theological paradigm by reconstructing the self-identifying narrative and theological framework in critical dialogue with recent developments in Anglo-American evangelicalism and postliberalism. Following the trajectory of the evangelical tradition in the post-Soviet context, a trajectory which relies on Western thought, the book adopts the narrative theological method of reading the world through the lens of Scripture. The self-identifying narrative of the community is reconstructed through a theological reading of the previous identity constructions in the light of recent discussions on Christ and the powers. The result of this study helpfully explains the dynamics of Eastern evangelicalism in a traditionally Russian Orthodox setting.

A History of Russian Literature Andrew Kahn, Mark Naumovich

Lipovetskiy, Irina Reyfman, Stephanie Sandler, 2018. Russia possesses one of the richest and most admired literatures of Europe, reaching back to the eleventh century. A History of Russian Literature provides a comprehensive account of Russian

writing from its earliest origins in the monastic works of Kiev up to the present day still rife with the creative experiments of post Soviet literary life The volume proceeds chronologically in five parts extending from Kievan Rus in the 11th century to the present day The coverage strikes a balance between extensive overview and in depth thematic focus Parts are organized thematically in chapters which a number of keywords that are important literary concepts that can serve as connecting motifs and case studies in depth discussions of writers institutions and texts that take the reader up close and Visual material also underscores the interrelation of the word and image at a number of points particularly significant in the medieval period and twentieth century The History addresses major continuities and discontinuities in the history of Russian literature across all periods and in particular bring out trans historical features that contribute to the notion of a national literature The volume s time range has the merit of identifying from the early modern period a vital set of national stereotypes and popular folklore about boundaries space Holy Russia and the charismatic king that offers culturally relevant material to later writers This volume delivers a fresh view on a series of key questions about Russia s literary history by providing new mappings of literary history and a narrative that pursues key concepts rather more than individual authorial careers This holistic narrative underscores the ways in which context and text are densely woven in Russian literature and demonstrates that the most exciting way to understand the canon and the development of tradition is through a discussion of the interrelation of major and minor figures historical events and literary politics literary theory and literary innovation Северный сборник
