Organic Chemistry Laboratory:

Operational Organic Chemistry John W. Lehman, 1981 Organic Chemistry: Laboratory Manual Steven Chung, 2022-04-30 Steven Chung's Organic Chemistry Laboratory Manual introduces students to standard techniques of organic chemistry and applies these techniques to the isolation and purification of products. It is suited for both a one semester survey course or the first of a two semester sequence. All experiments are readily completed in a three hour laboratory period.

Experimental Organic Chemistry Joaquín Isac-García, José A. Dobado, Francisco G. Calvo-Flores, Henar Martínez-García, 2015-10-30 Experimental Organic Chemistry Laboratory Manual is designed as a primer to initiate students in Organic Chemistry laboratory work. Organic Chemistry is an eminently experimental science that is based on a well established theoretical framework where the basic aspects are well established but at the same time are under constant development. Therefore it is essential for future professionals to develop a strong background in the laboratory as soon as possible forming good habits from the outset and developing the necessary skills to address the challenges of the experimental work. This book is divided into three parts. In the first safety issues in laboratories are addressed offering tips for keeping laboratory notebooks. In the second the material the main basic laboratory procedures preparation of samples for different spectroscopic techniques Microscale Green Chemistry and qualitative organic analysis are described. The third part consists of a collection of 84 experiments divided into 5 modules and arranged according to complexity. The last two chapters are devoted to the practices at Microscale Synthesis and Green Chemistry seeking alternatives to traditional Organic Chemistry. Organizes lab course coverage in a logical and useful way. Features a valuable chapter on Green Chemistry Experiments. Includes 84 experiments arranged according to increasing complexity.

Laboratory Techniques in Organic Chemistry V. K. Ahluwalia, 2013-12-30 This book deals with general information about work in Organic Chemistry Laboratory viz safety first aid different types of apparatus and their assemblies used for various types of reactions stirring arrangements heating techniques and low temperature experiments. Various methods used for purification of organic compounds have been described. Besides the normal technique the book includes write up about molecular distillation chromatography and electrophoresis. Special emphasis has been given to the methods which can be used for working up of organic reactions. Various methods which can be used successfully for isolation of products from natural sources have been incorporated. Emphasis has also been given on the isolation of products from oily mixture using the technique of Liquid Liquid extraction. Methods for determining the criteria of purity of organic compounds have been discussed. The book also deals with drying and purification of solvents preparation of spectroscopical grade solvents and HPLC solvents. The preparation of commonly used deuterated solvents which are used for NMR spectroscopy work is a special feature of this book.
