Cases in each chapter are chosen to illustrate concepts that fall under the particular chapter heading but the classification is not rigid. Each case is accompanied by several questions designed to focus the student's attention upon some of the more important issues raised by the case. After a brief introduction to guidelines for case analysis, this book goes on focusing on individual cases structured under the general topics of work motivation, the human element in decision making, stresses in managerial and professional life, and political maneuvering in organizations. The next two parts are devoted to cases of small groups and organizational behavior. Emphasis in small groups is placed upon cases that have the most relevance for knowledge workers including managers, professionals, technical, and sales personnel, while in organizational behavior focuses on bringing about changes in organizations, yet many of these changes are initiated at the individual and small group level. This book is of value to college and university undergraduate and masters level courses and in programs of management development.
