Nordic Transputer Applications Lars Annell, Martin Törngren, 1991 The national transputer user groups in the various Nordic countries have now evolved into the Nordic Transputer User Group NTUG During recent years the transputer has gained increased interest in the industry in these countries Transputer and Occam Research World Occam and Transputer User Group. Technical Meeting, 1993 The papers included in this book provide a wide coverage of current thinking and the new concepts which are being developed resulting from the introduction of the T9000 The role and use of the newly developed transputer and associated routing component the C104 is discussed and the use of existing range of transputers in the embedded systems market is also dealt with **Transputer and Occam Developments** World Occam and Transputer User Group. Technical Meeting, 1995 This volume contains papers presented at the 18th meeting of the World Occam and Transputer User Group Wotug The papers cover a wide range of transputer and OCCAM related topics such as the the porting and development of the OCCAM language highlighting the need for cross platform implementations of OCCAM compilers design approaches and applications *Abstract Machine Models for Parallel and Distributed Computing* M. Kara, J. R. Davy, D. Goodeve, 1996 Abstract Machine Models have played a profound though frequently unacknowledged role in the development of modern computing systems They provide a precise definition of vital concepts allow system complexity to be managed by providing appropriate views of the activity under consideration enable reasoning about the correctness and quantitative performance of proposed problem solutions and encourage communication through a common medium of expression Abstract Models in Parallel and Distributed computing have a particularly important role in the development of contemporary systems encapsulating and controlling an inherently high degree of complexity The Parallel and Distributed computing communities have traditionally considered themselves to be separate However there is a significant contemporary interest in both of these communities in a common hardware model a set of workstation class machines connected by a high performance network The traditional Parallel Distributed distinction therefore appears under threat Parallel Computing Jonathan P. Gray, Fazel Naghdy, 1995 The broadening of interest in parallel computing and transputers is reflected this book Topics discussed include concurrent programming graphics and image processing parallel applications robotics and control and software tools The book also features a collection of abstracts of poster presentations Parallel Computing and Transputers D. Arnold, 1994 The broadening of interest in parallel computing and transputers is reflected in this text Topics covered include concurrent programming graphics and image processing and robotics and control It is based on the proceedings of the 6th Australian Transputer and Occam User Group *Networks, Routers and Transputers* P. W. Thompson, P. H. Welch, 1993 The introduction of high speed serial communication links and general purpose VLSI routers offers new opportunities in system design C104 routers can be used to construct high throughput low latency interconnection networks for use in telecommunications parallel computers and electronic systems in general The

T9000 transputer with its integrated communication links can be connected directly to these networks providing high performance data handling protocol conversion and network control This text concentrates on aspects related to scaleable general purpose high performance computing low latency message passing and parallel processing *Progress in Transputer and Occam Research* World Occam and Transputer User Group. Technical Meeting,1994 The contributed chapters to this volume provide a broad coverage of the areas of research in current parallel computing architectures languages and tools graphics and fault tolerance Additionally the Inmos approach to building an asynchronous transfer mode system and the University of Twente method for designing system level embedded controllers are featured in this work
