Mathematical Design J. Paul Roth,1999 Electrical Engineering Computer Science Mathematical Design Building Reliable Complex Computer Systems IEEE Press Series on Engineering of Complex Computer Systems Phillip A Laplante and Alexander D Stoyen Series Editors As computer technology advances the debugging process for complex computer systems has become increasingly difficult To meet the challenge of program verification computer engineers are turning to mathematical techniques in hardware design Brought to you by distinguished scholar J Paul Roth Mathematical Design offers key insights into the research and development of the design of computers and computer systems This book features authoritative coverage of the most important topics in the field Two level logic minimization Verification of a supercomputer the IBM 3081 Algorithm for AC dynamic testing diagnosis Demonstration of hardware and software equivalence Complete with thought provoking exercises and engaging commentary Mathematical Design is an excellent reference for practicing hardware designers as well as other engineers with an interest in computer science and mathematics Logic Design of NanoICS Svetlana N. Yanushkevich,Vlad P. Shmerko,Sergey Edward Lyshevski,2017-12-19 Today s engineers will confront the challenge of a new computing paradigm relying on micro and nanoscale devices Logic Design of NanoICs builds a foundation for logic in nanodimensions and guides you in the design and analysis of nanoICs using CAD The authors present data structures developed toward applications rather than a purely theoretical treatment Requiring only basic logic and circuits background Logic Design of NanoICs draws connections between traditional approaches to design and modern design in nanodimensions The book begins with an introduction to the directions and basic methodology of logic design at the nanoscale then proceeds to nanotechnologies and CAD graphical representation of switching functions and networks word level and linear word level data structures 3 D topologies based on hypercubes multilevel circuit design and fault tolerant computation in hypercube like structures The authors propose design solutions and techniques going beyond the underlying technology to provide more applied knowledge This design oriented reference is written for engineers interested in developing the next generation of integrated circuitry illustrating the discussion with approximately 250 figures and tables 100 equations 250 practical examples and 100 problems Each chapter concludes with a summary references and a suggested reading section **American Book Publishing Record Cumulative 1998** R R Bowker Publishing,1999-03 Scientific and Technical Aerospace Reports ,1991 **Joint Computer Conference** ,1972 *Illinois Technograph* ,1953

System Performance Herbert Hellerman,Thomas F. Conroy,1975 Assessing the performance of complex expensive computer systems is a practical necessity and technical challenge Performance parameters are a set of precisely defined descriptors of efficiency helping operators to determine if the system is meeting stated objectives It is important to understand the descriptors the relationships between them and how they are influenced by choices in system architecture design and operations This book is concerned with performance as opposed to function and the reader is assumed to be familiar with functional aspects of machine organization and programming Performance evaluation brings together considerations of hardware software human and management factors This book is intended for senior undergraduates graduate students and computer professionals Papers and Discussions Presented ,1972 The Cumulative Book Index ,1999 **Tenth Annual Software Reliability Symposium** ,1993 **Aeronautical Engineering Review** ,1957 **Engineering News-record** ,1905 Monthly Catalog of United States Government Publications ,1995 U.S. Government Research & Development Reports ,1970 **JPRS Report** ,1989 **Bibliography of Scientific and Industrial Reports** ,1965-07 *Documentation Abstracts* ,1989 **Computer & Control Abstracts** ,1996 **Aero Digest** ,1953
