Winston,1996-12 Focusing on deterministic models this book is designed for the first half of an operations research course A subset of Winston's best selling OPERATIONS RESEARCH INTRODUCTION TO MATHEMATICAL PROGRAMMING offers self contained chapters that make it flexible enough for one or two semester courses ranging from advanced beginning to intermediate in level Appropriate for undergraduate majors MBAs and graduate students it emphasizes model formulations and model building skills as well as interpretation of computer software output LINDO GINO and LINGO software packages are available with the book in Windows Macintosh or DOS versions Linear algebra prerequisite

Computational Mathematical Programming Klaus Schittkowski,2013-06-29 This book contains the written versions of main lectures presented at the Advanced Study Institute ASI on Computational Mathematical Programming which was held in Bad Windsheim Germany F R from July 23 to August 2 1984 under the sponsorship of NATO The ASI was organized by the Committee on Algorithms COAL of the Mathematical Programming Society Co directors were Karla Hoffmann National Bureau of Standards Washington U S A and Jan Teigen Rabobank Nederland Zeist The Netherlands Ninety participants coming from about 20 different countries attended the ASI and contributed their efforts to achieve a highly interesting and stimulating meeting Since 1947 when the first linear programming technique was developed the importance of optimization models and their mathematical solution methods has steadily increased and now plays a leading role in applied research areas The basic idea of optimization theory is to minimize or maximize a function of several variables subject to certain restrictions This general mathematical concept covers a broad class of possible practical applications arising in mechanical electrical or chemical engineering physics economics medicine biology etc There are both industrial applications e g design of mechanical structures production plans and applications in the natural engineering and social sciences e g chemical equilibrium problems christallography problems
