Multilingual Learners and Academic Literacies Daniella Molle, Edynn Sato, Timothy Boals, Carol A. Hedgspeth, 2015-03-05 Shifting the discourse from a focus on academic language to the more dynamic but less researched construct of academic literacies this volume addresses three key questions What constitutes academic literacy What does academic literacy development in adolescent multilingual students look like and how can this development be assessed What classroom contexts foster the development of academic literacies in multilingual adolescents The contributing authors provide divergent definitions of academic literacies and use dissimilar theoretical and methodological approaches to study literacy development Nevertheless all chapters reflect a shared conceptual framework for examining academic literacies as situated overlapping meaning making practices This framework foregrounds students participation in valued disciplinary literacy practices Emphasized in the new college and career readiness standards the notion of disciplinary practices allows the contributing authors to bridge the language content dichotomy and take a more holistic as well as nuanced view of the demands that multilingual students face in general education classrooms The volume also explores the implications of the emphasis on academic literacy practices for classroom instruction research and policy

Language, Literacy, and Learning in the STEM Disciplines Alison L. Bailey, Carolyn A. Maher, Louise C. Wilkinson, 2018-02-01 With a focus on what mathematics and science educators need to know about academic language used in the STEM disciplines this book critically synthesizes the current knowledge base on language challenges inherent to learning mathematics and science with particular attention to the unique issues for English learners These key questions are addressed When and how do students develop mastery of the language registers unique to mathematics and to the sciences How do teachers use assessment as evidence of student learning for both accountability and instructional purposes Orienting each chapter with a research review and drawing out important Focus Points chapter authors examine the obstacles to and latest ideas for improving STEM literacy and discuss implications for future research and practice

Codeswitching in the Classroom Jeff MacSwan, Christian J. Faltis, 2019-10-16 Bringing together sociolinguistic linguistic and educational perspectives this cutting edge overview of codeswitching examines language mixing in teaching and learning in bilingual classrooms As interest in pedagogical applications of bilingual language mixing increases so too does a need for a thorough discussion of the topic This volume serves that need by providing an original and wide ranging discussion of theoretical pedagogical and policy related issues and obstacles in classroom settings the pedagogical consequences of codeswitching for teaching and learning of language and content in one way and two way bilingual classrooms Part I provides an introduction to socio linguistic and pedagogical contributions to scholarship in the field both historical and contemporary Part II focuses on codeswitching in teaching and learning and addresses a range of pedagogical challenges to language mixing in a variety of contexts such as literacy and mathematics instruction Part III looks

at language ideology and language policy to explore how students navigate educational spaces and negotiate their identities in the face of competing language ideologies and assumptions This volume breaks new ground and serves as an important contribution on codeswitching for scholars researchers and teacher educators of language education multilingualism and applied linguistics *The Contribution of Mathematics to School STEM Education* Judy Anderson,Katie Makar,2024-06-10 This book presents contemporary STEM education research conducted by mathematics education researchers and their collaborators which highlights the important and pivotal role of mathematics in school STEM education It showcases evidence of the types of integrated curriculum approaches to STEM education which highlight mathematics as a key component and where mathematical concepts can be learnt through integrated tasks These examples challenge the idea that mathematics is just an application or servant to the other STEM subjects and highlight the contribution that mathematics can make to the understanding and practices of the other STEM subjects This book fills a void in the current research literature on the role of mathematics in STEM education provides evidence of the possibilities for designing integrated STEM curriculum and highlights current understandings of the role of mathematics in school STEM education For researchers it identifies and elaborates gaps to encourage further exploration in this field **Handbook of Technological Pedagogical Content Knowledge (TPACK) for Educators** Michael Phillips,Evrin Baran,Punya Mishra,Matthew J. Koehler,2025-11-24 The third edition of the Handbook of Technological Pedagogical Content Knowledge TPACK for Educators addresses the concept and implementation of technological pedagogical content knowledge One of the most highly cited and widely recognized frameworks in educational technology the TPACK construct provides teachers with the knowledge and skills they need to meaningfully integrate technology into teaching in specific content areas This thorough substantive revision explores the emerging theoretical developments empirical efforts digital technologies and diverse contextual factors that impact TPACK s evolution and enactment around the world Critical perspectives on TPACK research on its deployment across specific content areas and integration into teacher education and professional development frame a variety of new and updated chapters covering research methods contextual knowledge artificial intelligence and more The Handbook of Technological Pedagogical Content Knowledge TPACK for Educators is simultaneously a mandate and a manifesto on engagement with technology in today s classrooms **Handbook of Educational Psychology** David C. Berliner,Robert C. Calfee,2013-02-01 Sponsored by Division 15 of APA the second edition of this groundbreaking book has been expanded to 41 chapters that provide unparalleled coverage of this far ranging field Internationally recognized scholars contribute up to date reviews and critical syntheses of the following areas foundations and the future of educational psychology learners development individual differences cognition motivation content area teaching socio cultural perspectives on teaching and learning teachers and teaching instructional design teacher assessment and modern perspectives on research methodologies data and data analysis New chapters cover topics such as adult development self regulation changes in knowledge and
