When we learn new and complex materials our cognitive processing capabilities are usually severely reduced due to limited working memory capacity Learner expertise in a specific domain decreases those limitations by enabling the use of the expert s organised knowledge base In many instructional situations however expertise may also trigger additional cognitive load because of the processing of redundant information Recently strong evidence has emerged that instructional techniques which are highly effective with novice learners can lose their effectiveness and even have negative consequences when used with advanced learners As learners become more knowledgeable in a domain instructional techniques and procedures often need to change radically in order to remain efficient To tailor instruction to levels of learner knowledge in computer based learning environments it is critical to have a simple and rapid measure of learner expertise suitable for real time testing research based recommendations on instructional techniques and diagnostic assessment methods that are suitable for advanced learners in multimedia learning environments

Introducing Nonroutine Math Problems to Secondary Learners Robert London,2023-08-22 Offering secondary math educators an innovative holistic and process orientated approach for implementing nonroutine problems into their curriculum this book defines and establishes practical strategies to develop students problem solving skills The text focuses on the process skills necessary to solve nonroutine problems in mathematics and other subjects with the goal of making students better problem solvers both in and outside of the classroom Chapters present and define a curriculum of over 60 nonroutine problems in mathematics and other content areas and explore the pedagogy to implement this type of curriculum consistent with the NCTM Standards and Principles to Action Four different models of implementation are discussed alongside a structured approach through seven difficulty levels with examples to ensure that every student independent of their mastery of mathematics content can improve their ability to solve nonroutine problems It emphasizes to students how to transfer their problem solving skills to other real world areas including increasing ecological awareness appreciating diversity and addressing significant and meaningful problems in their life school and community The curriculum introduced in this book can be included as a component of a traditional four year

academic high school curriculum aligned with the Common Core Mathematical Practices or as part of a one year isolated required or elective mathematics course Based on extensive field testing this approach has been effective in both traditional mathematics courses and math electives such as a course in Problem Solving This book provides the necessary guidance to allow each mathematics teacher to effectively integrate the approach in their classrooms This book is ideal for secondary mathematics teachers of all levels as well as teachers of mathematics electives *Writing about the Mathematical Problem-solving Process to Help Nontraditional College Students Solve Mathematics Problems in a Beginning Algebra Course* Kenneth Michael Williams,1997 **Mathematics Problem-solving Challenges For Secondary School Students And Beyond** Alan Sultan,David L Linker,2016-02-25 This book is a rare resource consisting of problems and solutions similar to those seen in mathematics contests from around the world It is an excellent training resource for high school students who plan to participate in mathematics contests and a wonderful collection of problems that can be used by teachers who wish to offer their advanced students some challenging nontraditional problems to work on to build their problem solving skills It is also an excellent source of problems for the mathematical hobbyist who enjoys solving problems on various levels Problems are organized by topic and level of difficulty and are cross referenced by type making finding many problems of a similar genre easy An appendix with the mathematical formulas needed to solve the problems has been included for the reader s convenience We expect that this book will expand the mathematical knowledge and help sharpen the skills of students in high schools universities and beyond *Higher Mathematics for Students of Chemistry and Physics* Joseph William Mellor,1905 **Maths Problem Solving for Higher Achieving Students** Ian Bull,2020 **Using the Common Core State Standards for Mathematics With Gifted and Advanced Learners** National Assoc For Gifted Children,Linda J.
