A Matter of Degrees Gino Segre,2003-07-01 In a wonderful synthesis of science history and imagination Gino Segre an internationally renowned theoretical physicist embarks on a wide ranging exploration of how the fundamental scientific concept of temperature is bound up with the very essence of both life and matter Why is the internal temperature of most mammals fixed near 98.6 How do geologists use temperature to track the history of our planet Why is the quest for absolute zero and its quantum mechanical significance the key to understanding superconductivity And what can we learn from neutrinos the subatomic messages from the sun that may hold the key to understanding the birth and death of our solar system In answering these and hundreds of other temperature sensitive questions Segre presents an uncanny view of the world around us    The Coherence Theory of Truth Haig A.
