**Handbook for Conducting Research on Human Sexuality** Michael W. Wiederman, Bernard E. Whitley, Jr., 2012-12-06  
Human sexuality researchers often find themselves faced with questions that entail conceptual methodological or ethical issues for which their professional training or prior experience may not have prepared them. The goal of this handbook is to provide that guidance to students and professionals interested in the empirical study of human sexuality from behavioral and social scientific perspectives. It provides practical and concrete advice about conducting human sexuality research and addresses issues inherent to both general social scientific and specific human sexuality research. This comprehensive resource offers a unique multidisciplinary examination of the specific methodological issues inherent in conducting human sexuality research. The methodological techniques and advances that are familiar to researchers trained in one discipline are often unfamiliar to researchers from other disciplines. This book is intended to help enrich the communication between the various disciplines involved in human sexuality research. Each of the 21 self-standing chapters provides an expert overview of a particular area of research methodology from a variety of academic disciplines. It addresses those issues unique to human sexuality research such as how to measure sexuality variables, how to design studies, recruit participants and collect data, how to consider cultural and ethical issues, and how to perform and interpret statistical analyses. This book is intended as a reference tool for researchers and students interested in human sexuality from a variety of disciplines including psychology, sociology, family science, health communication, nursing, medicine, and anthropology.

***The Moral Demands of Affluence*** Garrett Cullity, 2006-09-21  
How much are we morally required to do to help people who are much worse off than us? On any credible moral outlook, other people's pressing need for assistance can ground moral requirements on us to help them. Requirements of beneficence: How far do those requirements extend? One way to think about this is by means of a simple analogy: an analogy between joining in efforts to help people at a distance and rescuing a needy person yourself directly. Part I of Garrett Cullity's book examines this analogy. In some ways the analogy is not only simple but politically and metaphysically simplistic. However, it contains an important truth: we are morally required to help other people indirectly as well as directly. But the number of needy people in the world is enormous and their need is very great. Once we start to recognize requirements to help them, when is it morally acceptable to stop? Cullity answers this question in Part II. Examining the nature of beneficence, he argues that its requirements only make sense on the assumption that many of the interests we share in common, rich and poor alike, are interests it is not wrong to pursue.

***From Morality to Virtue*** Michael A. Slote, 1992  
Some have asked for more attention to the virtues within the compass of familiar underlying approaches to morality like utilitarianism and Kantian ethics. However, others have argued that a freestanding and systematic form of virtue ethics would have advantages over other large-scale approaches. This work attempts the latter approach.

***Artificial Morality*** Peter Danielson, 2002-03-11  
This book explores the role of artificial intelligence in the development of a claim that

morality is person made and rational Professor Danielson builds moral robots that do better than amoral competitors in a tournament of games like the Prisoners Dilemma and Chicken The book thus engages in current controversies over the adequacy of the received theory of rational choice It sides with Gauthier and McClennan who extend the devices of rational choice to include moral constraint Artificial Morality goes further by promoting communication testing and copying of principles and by stressing empirical tests *A System of Ethics* Friedrich Paulsen, Frank Thilly, 1899 **book II. The individual and the society. book III. Man and the universe** Hastings Rashdall, 1907 **The Freethinker**, 1896
