Moral Stake In Education Contested Premises And Practices:

The Moral Stake in Education Joan F. Goodman, Howard Lesnick, 2001 B This scholarly work addresses the complex issues of moral education as they arise in school settings. It grapples with the relationship between education and moral action as confronted by teachers, students, and administrators. The Moral Stake in Education encourages educators to understand the theoretical debates now raging and the philosophical positions on which they are based. It asks them to consider their own viewpoints as they relate to classroom situations and to their own teaching. Educators or others interested in the Educational system [Educating Moral Sensibilities in Urban Schools](#), 2019-02-11. Nowadays schools face the challenge of creating pedagogical environments that are sensitive to numerous individual backgrounds in order to support students' social and academic success. Urban schools are communities with rich possibilities to learn how to think, feel, and act morally. In this task, principals, teachers, parents, and students of the schools each have their own voice. All these voices have to be heard in order to build communities with moral sensibilities. This book brings together recent work by international researchers from nine countries in the fields of moral development and citizenship education. The book consists of twelve chapters and it is divided into three parts. While the first part deals with the voices of urban school educators, the second part contains chapters with the focus on students. The third part is about curriculum programs and practices in schools that contribute to the education of moral sensibilities in the school communities. This book can be used as a textbook in moral and citizenship education or as an updated research report on international research on moral sensibilities.

The Ethical Teacher Campbell, Elizabeth, 2003-09-01. It presents the concept of ethical knowledge as it is revealed as it is challenged and as it may be used in schools.

Portrait of a Moral Agent Teacher Gillian R. Rosenberg, 2015-06-05. Teaching morally and teaching morality are understood as mutually dependent processes necessary for providing moral education or the communication of messages and lessons on what is right, good, and virtuous in a student's character. This comprehensive and contextualized volume offers anecdotes and experiences on how an elementary schoolteacher envisions, enacts, and reflects on the ethical teaching and learning of her students. By employing a personally developed form of moral education that is not defined by any particular philosophical or theoretical orientation, this volume relates that classroom-based moral education can therefore be conceived of and promoted as moral agency. Accentuated by the teacher's voice to offer the experience of being in the classroom, this volume enables others to transfer relevant practices to their own teaching contexts.
