*Teaching Powerful Problem-Solving in Math* Catherine C. Lewis, Akihiko Takahashi, Shelley Friedkin, Nora Houseman, Sara Liebert, 2025-08-22 *Teaching Powerful Problem Solving in Math* provides the first in-depth portrait of schoolwide lesson study showing how U.S. teachers at several schools used it to implement powerful problem-based mathematics instruction. Students learn mathematics by confronting a novel problem and building the new understanding of the mathematical concepts needed to solve it just as mathematicians would. By learning in this way, students discover the power of their own thinking and gain confidence that extends well beyond mathematics. This book introduces readers to urban elementary and K-8 schools where teachers have dramatically transformed math learning for teachers and for students. Readers will follow teachers as they transform instruction using schoolwide lesson study, building powerful new ways for educators to learn from each other and practice innovative teaching techniques. The authors use in-depth classroom portraits from the outset of schoolwide lesson study and three years later to illuminate the changes in mathematics instruction at a school that raised its proficiency on Smarter Balanced Assessment from 15% to 56%. Extensive resources and links are provided to help readers understand and build on the work of these schools, which is grounded in established principles of collective efficacy, intrinsic motivation, and learner agency for both students and teachers.

**Book Features:** Shows how teaching through problem solving can erase the achievement gap in mathematics learning. Provides the first in-depth portrait of schoolwide lesson study showing how U.S. teachers at several schools build it and use it to transform teaching. Profiles teachers leading the transformation of instruction to achieve the ambitious vision of learning embodied in recent standards. Uses photographs, student work, and detailed classroom descriptions to bring to life mathematics lessons in year 1 and year 4 of the school's work to build problem solving. Provides examples and links to the strategies teachers use to make student thinking visible and actionable during mathematics lessons. Includes lesson plans, photographs of board work, student journals, school newsletters, self-assessment rubrics, and dozens of links to the resources needed to begin using teaching through problem solving and schoolwide lesson study. Provides long-term teacher-led solutions for professional learning and for mathematics instruction that have been shown to improve teacher retention and student proficiency.

**Symbolizing, Modeling and Tool Use in Mathematics Education** K.P. Gravemeijer, 2002-12-31 This book explores the option of building

on symbolizing modeling and tool use as personally meaningful activities of students It discusses the dimension of setting varying from the study of informal spontaneous activity of students to an explicit focus on instructional design and goals and effects of instruction and the dimension of the theoretical framework of the researcher varying from constructivism to activity theory cognitive psychology and instructional design theory First European Congress of Mathematics Anthony Joseph, Fulbert Mignot, Francois Murat, Bernard Prum, Rudolf Rentschler, 1994-12-01 The first European Congress of Mathematics was held in Paris from July 6 to July 10 1992 at the Sorbonne and Pantheon Sorbonne universities It was hoped that the Congress would constitute a symbol of the development of the community of European nations More than 1 300 persons attended the Congress The purpose of the Congress was twofold On the one hand there was a scientific facet which consisted of forty nine invited mathematical lectures that were intended to establish the state of the art in the various branches of pure and applied mathematics This scientific facet also included poster sessions where participants had the opportunity of presenting their work Furthermore twenty four specialized meetings were held before and after the Congress The second facet of the Congress was more original It consisted of sixteen round tables whose aim was to review the prospects for the interactions of mathematics not only with other sciences but also with society and in particular with education European policy and industry In connection with this second goal the Congress also succeeded in bringing mathematics to a broader public In addition to the round tables specifically devoted to this question there was a mini festival of mathematical films and two mathematical exhibits Moreover a Junior Mathematical Congress was organized in parallel with the Congress which brought together two hundred high school students Mathematical Modeling, Estimation, and Imaging David C.
