Nuclear Ethics in the Twenty-First Century Thomas E. Doyle, II, 2020-01-31 This book relates a complex ethical re assessment of the continued reliance by some states on nuclear weapons as instruments of state power This re assessment is more urgent considering the relatively recent intensification of great power conflict dynamics and the nuclear weapon states recommitments to modernizing augmenting or tailoring their nuclear forces to address vital state and alliance interests And especially since the beginning of the administration of U S President Donald J Trump these recommitments have accelerated the degree to which the political and moral dilemmas of the threat of nuclear use define and intensify existential risks for specific states and the international community at large To execute this re assessment this book details how strategic political legal and moral reasoning are deeply intertwined on the questions of vital state and global values Its ontological assumptions are taken from a broadly construed IR Constructivist stance and its epistemological approach applies non ideal moral principles informed by Kantian thought to selected problems of nuclear armed security competition as they evolved since President Barack Obama s 2009 Prague Declaration This non ideal moral approach employed is committed to the view that the dual imperatives of humanity s survival and the common security of states requires an international order which privileges considerations of justice over power political considerations This non ideal moral approach is a necessary element of theorizing a set of practices to effectively address the challenges and dilemmas of reordering international politics in terms of justice

[Encyclopedia of Violence, Peace, and Conflict](#), 2008-09-05 The 2nd edition of Encyclopedia of Violence Peace and Conflict provides timely and useful information about antagonism and reconciliation in all contexts of public and personal life Building on the highly regarded 1st edition 1999 and publishing at a time of seemingly inexorably increasing conflict and violent behaviour the world over the Encyclopedia is an essential reference for students and scholars working in the field of peace and conflict resolution studies and for those seeking to explore alternatives to violence and share visions and strategies for social justice and social change Covering topics as diverse as Arms Control Peace Movements Child Abuse Folklore Terrorism and Political Assassinations the Encyclopedia comprehensively addresses an extensive information area in 225 multi disciplinary cross referenced and authoritatively authored articles In his Preface to the 1st edition Editor in Chief Lester Kurtz wrote The problem of violence poses such a monumental challenge at the end of the 20th century that it is surprising we have addressed it so inadequately

We have not made much progress in learning how to cooperate with one another more effectively or how to conduct our conflicts more peacefully. Instead we have increased the lethality of our combat through revolutions in weapons technology and military training. The Encyclopedia of Violence, Peace and Conflict is designed to help us to take stock of our knowledge concerning these crucial phenomena. Ten years on, the need for an authoritative and cross-disciplinary approach to the great issues of violence and peace seems greater than ever. More than 200 authoritative multidisciplinary articles in a 3-volume set. Many brand new articles alongside revised and updated content from the First Edition. Article outline and glossary of key terms at the beginning of each article. Entries arranged alphabetically for easy access. Articles written by more than 200 eminent contributors from around the world. The American Ecclesiastical Review Herman Joseph Heuser, 1960 *The Teaching of Ethics in the Military* Peter L. Stromberg, Malham M. Wakin, Daniel Callahan, 1982 *Moral Demands and Personal Obligations* Josef Fuchs, 1993. Provides an excellent understanding of proportionalism as well as a good perspective on contemporary issues in moral theology. Theological Studies **Abolition of Nuclear Weapons as a Moral Imperative** John Kultgen, 2015-02-17. Abolition of Nuclear Weapons as a Moral Imperative argues that the use of nuclear weapons as a threat in policies of nuclear deterrence violate basic principles of morality and consequently the abolition of nuclear weapons from the world is a moral imperative. Nations that have them. The focus is on the United States since it will have to take the lead in any program of abolition. The argument is formulated in terms accessible to theorists in different disciplines and activists in a large range of causes. It appeals to principles that are widely shared but whose application to national policies especially to deterrence by threats of mass destruction has been debated ever since nuclear weapons were developed. The book explains what is meant by the immorality of a national policy, the stake which citizens have in their agents acting morally and the role of their opinions in seeing that they do. The argument of the book is couched in terms of consequences. The effects of the U.S.'s nuclear deterrent on the probability of nuclear war are difficult to calculate but the harms for the country and others across the globe caused by the immense apparatus necessary to make U.S. threats credible are sufficient to condemn the policy. The last part of the book is devoted to ways the U.S. can take the lead in safe and effective steps necessary to abolish the weapons and prevent their reintroduction into the world. The Nuclear Predicament Peter R. Beckman, 1999. Ideal for use in all Nuclear Issues, American Foreign Policy, International Relations, Global Issues and Contemporary History courses at the undergraduate level. Thoroughly revised to reflect the changes that the end of the cold war has brought to nuclear issues and to examine our new nuclear future, this interdisciplinary text shows how nuclear weapons have changed the world militarily, politically, socially and ethically. Seeking to shake readers out of their nuclear complacency, it fully examines the evolving nuclear predicament that nuclear weapons can be massively destructive yet we are moving into a period when nuclear weapons are more likely to be used and considers particular strategies to cope with and shape the nuclear future. *Nuclear Weapons, Arms Control, and the Threat of Thermonuclear War*, 1989 Morality

and Modern Warfare William J. Nagle, 1960 **The Way of the Lord Jesus: Christian moral principles** Germain Gabriel Grisez, 1983 **Right and Reason** Austin Fagothey, 1963 With the modern value theory as basis the point of discussion is Aristotelian Thomistic The Ethics of War and Peace Douglas P. Lackey, 1989 A moral philosopher discusses the rights and wrongs of specific military campaigns from 1914 on including the war in Vietnam the Six Day War the British bombing campaign against Germany the American bombing of Japan the Korean War the Indo Pakastani War of 1971 the 1976 raid on Entebbe and the 1986 attack against Libya **Nuclear Weapons, Arms Control, and the Threat of Thermonuclear War, Special Studies** Paul Kesaris, 1991 **Hamline Journal of Public Law and Policy**, 1989 *Bernard Brodie and the Foundations of American Nuclear Strategy* Barry Howard Steiner, 1991 Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie's work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom Katallagete, 1984
