Moral Philosophy For Education Educations:

An Introduction to Moral Philosophy and Moral Education Robin Barrow,2007-08-07 This book presents and argues for a moral theory which draws on most of the major theoretical positions to some degree but it also spells out the limits and boundaries of a moral theory In doing so it exposes a number of common confusions and misunderstandings about morality and presents a strong argument for some indisputable truths in relation to the moral sphere Divided into four parts the book covers the key issues within moral philosophy part one provides a lucid and powerful account of the nature and limits of moral theory sharply distinguishing it from religion part two outlines a positive moral theory by exploring the defining principles of morality and the reasons for being moral part three distinguishes moral values from others such as ecological health and safety and sexual values part four is concerned with the implications of our moral understanding for moral education While this book concentrates on argument and ideas a commentary to each chapter provides historical context and contemporary reference points It will prove an invaluable resource for students of both Education and Philosophy

Moral Philosophy for Education (RLE Edu K) Robin Barrow,2012-05-04 Teachers and students are frequently confused as to the relevance of abstract philosophical theorising to the reality of the classroom and this book is distinctive for the attention it devotes to philosophy and its potential contribution to practical matters and education in particular The author is critical of many current views of the philosophy of education and argues the validity of philosophy as an integral part of education in its own right against the creation of a new branch of philosophy the philosophy of education The book stresses that relativist ethical theories are no more known to be valid than the absolutist theories they have replaced and in the second section the author argues for a modified utilitarian position The final section enables the reader to relate the general argument of the second part to several specific issues

Moral Education

Colin Wringe,2006-02-14 Casual reference to moral education or the manner in which young people should be brought up to behave may provoke a range of responses depending on the context and the personalities and ideological perspectives of those present In the past these responses sometimes included a Rousseau-esque assertion of the inherent goodness of all human beings which only needed to be left to emerge uncorrupted and undistorted with the help of infinite loving kindness on the part of teachers all with the patience of saints More extreme versions of this view may have comprised vehement protest at the very idea of the state through its educational institutions concerning itself at all with such matters which were felt to be properly the province of the family or religious organisations if not a matter of individual choice for young people themselves when they were grown up Explicit proposals for moral education were invariably at risk of being perceived as indoctrination or an abuse of children's rights of freedom and autonomous development More frequently these days the response may be a succinct list of the speaker's own choice moral prescriptions an assertion that these need to be inculcated in a clear and unequivocal way to all young people of whatever age inclination or social experience and often enough a

statement of the sanctions to be applied to those who do not or will not conform Philip Henry Phenix,1961 *Education and the Common Good* Philip Henry Phenix,1977 **Education and the Common Good** Michael A. Peters, Tina Besley, Huajun Zhang, 2021-07-30 Educational philosophies of self cultivation as the cultural foundation and philosophical ethos for education have strong and historically effective traditions stretching back to antiquity in the classical cradle civilizations of China and East Asia India and Pakistan Greece and Anatolia focused on the cultural traditions in Confucianism Taoism and Buddhism in the East and Hellenistic philosophy in the West This volume in East West dialogues in philosophy of education examines both Confucian and Western classical traditions revealing that although each provides its own distinct figure of the virtuous person they are remarkably similar in their conception and emphasis on moral self cultivation as a practical answer to how humans become virtuous The collection also examines self cultivation in Japanese traditions and also the nature of Michel Foucault's work in relation to ethical and aesthetic ideals of Hellenistic self cultivation *Moral Thought in Educational Practice* Hugh Sockett, 2018-08-14 This book demonstrates how pervasive moral thought can be in educational thought and practice By analyzing research on the moral and intellectual qualities in curriculum as well as the integration of personhood and citizenship development in classroom work this book demonstrates the primacy of the moral in various educational settings With an additional emphasis on morality as it pertains to teaching as a vocation Moral Thought in Educational Practice examines the objectives of teacher education and offers an account of moral purposes within the knowledge base for teaching *Ethics Teaching in Higher Education* Daniel Callahan, Sissela Bok, 1980-09-30 A concern for the ethical instruction and formation of students has always been a part of American higher education Yet that concern has by no means been uniform or free from controversy The centrality of moral philosophy in the undergraduate curriculum during the mid 19th Century gave way later during that era to the first signs of increasing specialization of the disciplines By the middle of the 20th Century instruction in ethics had by and large become confined almost exclusively to departments of philosophy and religion Efforts to introduce ethics teaching in the professional schools and elsewhere in the university often met with indifference or outright hostility The past decade has seen a remarkable resurgence of the interest in the teaching of ethics at both the undergraduate and the professional school levels Beginning in 1977 The Hastings Center with the support of the Rockefeller Brothers Fund and the Carnegie Corporation of New York undertook a systematic study of the state of the teaching of ethics in American higher education

Justice, Morality and Education Les Brown, 1985-10-28 **Moral Philosophy and Moral Education** Thora Ilin Bayer, 2017-06-09 Moral Philosophy and Moral Education considers the interconnections of ethics education and the philosophy of culture as related to the human concern with self knowledge The individual self finds its inner life writ large in the forms of culture such as religion art and history Such forms of cultural life represent and embody normative ideals that can provide the necessary content to shape the character and the conduct of civic life Thora Ilin Bayer draws upon the

ancient Greek view of education as *paideia* and the conception of *Bildung* of the German idealist philosophers. These two ideas of education aim at the development of the whole person as distinct from training in a particular skill subject matter technique or occupation. The education of the whole person aims at the production in the individual of a broad mental outlook harmoniously joined with a knowledge of the great perspectives and principles of human culture as it takes its various shapes within the history of humanity. Moral philosophy requires both culture and the individual as its terms of inquiry and moral education requires a vision of how to have these two terms interact to form a whole. *Educating the Virtues* David Carr, 2012. Tracing the views on moral life of such past philosophers as Plato Aristotle and Kant as well as of such theorists as Durkheim Freud Piaget and Kohlberg the author sets forth a full discussion of the nature and educational implications of the idea of moral virtue. **Moral Philosophy and Education in the Enlightenment** Dieter Jiranek, 2001. *A Platonic Theory of Moral Education* Mark Jonas, Yoshiaki Nakazawa, 2020-09-30. Discussing Plato's views on knowledge recollection dialogue and epiphany this ambitious volume offers a systematic analysis of the ways that Platonic approaches to education can help students navigate today's increasingly complex moral environment. Though interest in Platonic education may have waned due to a perceived view of Platonic scholarship as wholly impractical this volume addresses common misunderstandings of Plato's work and highlights the contemporary relevance of Plato's ideas to contemporary moral education. Building on philosophical interpretations the book argues persuasively that educators might employ Platonic themes and dialogue in the classroom. Split into two parts the book looks first to contextualise Plato's theory of moral education within political ethical and educational frameworks. Equipped with this knowledge part two then offers contemporary educators the strategies needed for implementing Plato's educational theory within the pluralistic democratic classroom setting. *A Platonic Theory of Moral Education* will be of interest to academics researchers and post graduate students in the fields of ethics Plato scholarship moral psychology educational foundations and the philosophy of education. This book would also benefit graduate students and scholars in teacher education. Mark E. Jonas is Professor of Education and Professor of Philosophy by courtesy at Wheaton College US. Yoshiaki Nakazawa is Assistant Professor of Education at University of Dallas US. *Virtue Ethics and Moral Education* David Carr, Jan Steutel, 2005-06-22. This collection of original essays on virtue ethics and moral education seeks to fill this gap in the recent literature of moral education combining broader analyses with detailed coverage of the varieties of virtue weakness and integrity relativism and rival traditions means and methods of educating the virtues. The rare collaboration of professional ethical theorists and educational philosophers provides a ground breaking work and an exciting new focus in a growing area of research. *A Theory of Moral Education* Michael Hand, 2017-11-14. Children must be taught morality. They must be taught to recognise the authority of moral standards and to understand what makes them authoritative. But there's a problem the content and justification of morality are matters of reasonable disagreement among reasonable people. This makes it hard to see how educators can secure children's commitment to moral standards without

indoctrinating them In A Theory of Moral Education Michael Hand tackles this problem head on He sets out to show that moral education can and should be fully rational It is true that many moral standards and justificatory theories are controversial and educators have an obligation to teach these nondirectively with the aim of enabling children to form their own considered views But reasonable moral disagreement does not go all the way down some basic moral standards are robustly justified and these should be taught directly with the aim of bringing children to recognise and understand their authority This is an original and important contribution to the philosophy of moral education which lays a new theoretical foundation for the urgent practical task of teaching right from wrong **Philosophy of Education** T. W. Moore,1982-01-01

Philosophical Discussion in Moral Education Tim Sprod,2003-10-04 In recent years there has been an increase in the number of calls for moral education to receive greater public attention In our pluralist society however it is difficult to find agreement on what exactly moral education requires Philosophical Discussion in Moral Education develops a detailed philosophical defence of the claim that teachers should engage students in ethical discussions to promote moral competence and strengthen moral character Paying particular attention to the teacher's role this book highlights the justification for and methods of creating a classroom community of ethical inquiry *Ethics in Professional Education* Christopher Martin,Claudia W. Ruitenberg,2019-07-09 Recent years have seen a growing emphasis on ethics education in different professions such as medicine and teaching However the implications of this emphasis for professional education programs have been underdeveloped In this volume philosophers of education and ethics educators engaged in a variety of professional contexts in Canada the UK Norway Malta and Sweden assess the state of ethics education and the role if any of philosophical approaches to ethics for those professional contexts This volume speaks to teacher medical and business education and the education of school psychologists Each of these fields has its own context aims and expertise generating distinctive ethical challenges As such ethics curricula cannot be uncritically transplanted from one professional context to another Nonetheless the arguments and analyses in this volume point to a shared concern about the role of moral respect self understanding and virtue in the education of professionals The chapters examine a wide range of topics including empirical ethics core concepts in professional ethics moral agency the ethics of ethics education risk taking professional ethics as a practice with its own ethical requirements and the tensions between the individual client patient student and the increasing generalization of professional systems This book was originally published as a special issue of Ethics in Education
