Moral Reckoning:

A Grounded Theory of Moral Reckoning in Nursing Alvita K. Nathaniel, 2003 **Essentials of Nursing Research** Denise F. Polit, Cheryl Tatano Beck, 2010 *Essentials of Nursing Research* is designed to teach students how to read understand analyze and evaluate research reports in nursing practice The Seventh Edition has been updated with stronger coverage of evidence based practice including content on how to read interpret and critique systematic reviews which are considered by many to be a cornerstone of evidence based practice Also included in the Seventh Edition a more balanced presentation of medical and social science methods and nomenclature enhanced coverage of qualitative research and more

A Moral Reckoning Daniel Jonah Goldhagen, 2007-12-18 With his first book *Hitler's Willing Executioners* Daniel Jonah Goldhagen dramatically revised our understanding of the role ordinary Germans played in the Holocaust Now he brings his formidable powers of research and argument to bear on the Catholic Church and its complicity in the destruction of European Jewry What emerges is a work that goes far beyond the familiar inquiries most of which focus solely on Pope Pius XII to address an entire history of hatred and persecution that culminated in some cases in an active participation in mass murder More than a chronicle *A Moral Reckoning* is also an assessment of culpability and a bold attempt at defining what actions the Church must take to repair the harm it did to Jews and to repair itself Impressive in its scholarship rigorous in its ethical focus the result is a book of lasting importance Middle Range Theory for Nursing Mary Jane Smith, Patricia R. Liehr, Roger D. Carpenter, 2023-01-25 Three time recipient of the AJN Book of the Year Award The completely revised fifth edition of this authoritative text encompasses the most current middle range theories for graduate nursing students and researchers User friendly and consistently organized it helps readers to understand the connection of research to larger conceptual models in nursing The fifth edition presents three new theories a revised chapter on concept building two published examples demonstrating the concept building process and a new section on the application of middle range theory that addresses its use for practice and education Additional new features include the fresh perspectives of a third editor a two color design to enhance readability and discussion questions concluding each chapter The text describes sixteen middle range theories and elaborates on disciplinary perspectives providing an organizing framework and evaluating the theory Each theory is consistently organized by purpose historical development primary concepts the relationships among concepts and its use in nursing practice and research Understanding of concepts is enhanced by the book's use of the ladder of abstraction for each theory to explain its relationship to philosophical conceptual and empirical theory dimensions New to the Fifth Edition Includes three new theories Inner Strength Unitary Caring and Nature Immersion for a total of 16 theories A completely new section on application of theory to practice New chapter on application of middle range theory to education Extensively revised chapter on building concepts for research Two color design to enhance readability Discussion questions at the end of each chapter to promote class dialogue Nine practice examples relating to application of middle range theory

The expertise of a new editor Key Features Delivers theories in consistent format to facilitate comparisons Presents published exemplars demonstrating concept building User friendly and consistently organized Summarizes middle range theories developed between 1988 and 2020 *Qualitative Designs and Methods in Nursing (Set)* Mary De Chesnay, PhD, RN, PMHCNS-BC, FAAN, 2014-12-19 This is the first series to comprehensively address leading qualitative research designs and methods from a nursing perspective and is a must have for every research library These are practical how to guides to conducting research using seven different qualitative designs that encompass new and traditional methodologies Written by Dr Mary de Chesnay a noted qualitative research scholar and contributing specialists in each of the qualitative methods each of the seven books discusses the theoretical rationale for using a particular design describes its components and delineates a practical plan to conduct studies Utilizing a practical problem solving approach the books delineate appropriate methods ethical considerations critical issues and potential pitfalls Examples of published qualitative nursing research worldwide along with author commentary support the new researcher in making decisions and facing challenges Case studies follow a template that includes a description of the study data collection and analysis and dissemination Also included are techniques whereby researchers can ensure high standards of rigor and an extensive bibliography and list of resources The book s practical point of view is geared to help novice researchers and specialists alike develop or expand their competencies engage graduate faculty and students and aid nursing research staff in larger hospitals and other healthcare institutions as well as in service educators and students Key Features of this One of a Kind Resource Library Focuses on practical problem solving Reviews the philosophical basis for each qualitative design Disseminates the most current references in each design Provides a plan to conduct studies using the design and discusses appropriate methods ethical considerations and potential challenges Showcases the research of international scholars Is peer reviewed by design and method experts Middle Range Theory for Nursing, Second Edition Mary Jane Smith, Patricia R.
