## More Advertising Worldwide:

**More Advertising Worldwide** Ingomar Kloss, 2012-12-06 The first volume of this reader was on the subject of advertising conditions in Australia Belgium Finland France Germany India Japan Russia South Africa Taiwan and the USA Not forgetting Marieke de Mooij's chapter on the impact of culture on advertising With this second volume the title Advertising Worldwide becomes a little bit more true Again other important countries are investigated with respect to their specific advertising structures The authors of the different countries had the same briefing as in the first volume What are the social cultural or religious features of advertising and advertising practices Are there any taboos Which legal restrictions apply What kind of advertising infrastructure is there Are there any institutions federations or boards of advertising Which media are readily available How are media data collected What are the methods of gaining advertising data How can specific target groups be addressed Are there any particular preferences concerning the use of media Assessing the choice of countries in the two volumes of Advertising Worldwide one has to conclude as a first resume that it is not primarily the more theoretical question of standardization or differentiation which dominates the advertising strategy at least for consumer goods but the very practical necessity of adapting to the respective specific advertising conditions of each country A standardized global even multinational advertising campaign has to be considered the exception rather than the rule
