Generalized Linear Models Dipak K. Dey, Sujit K. Ghosh, Bani K. Mallick, 2000-05-25 This volume describes how to conceptualize, perform and critique traditional generalized linear models (GLMs) from a Bayesian perspective and how to use modern computational methods to summarize inferences using simulation. Introducing dynamic modeling for GLMs and containing over 1000 references and equations, *Generalized Linear Models* considers parametric and semiparametric approaches to overdispersed GLMs, presents methods of analyzing correlated binary data using latent variables. It also proposes a semiparametric method to model link functions for binary response data and identifies areas of important future research and new applications of GLMs.
