Mormon Architecture:

Nineteenth-Century Mormon Architecture and City Planning C. Mark Hamilton, 1995-08-24 This book is the first comprehensive study of Mormon architecture. It centers on the doctrine of Zion which led to over 500 planned settlements in Missouri, Illinois, Utah, Idaho, Wyoming, Colorado, New Mexico, Arizona, California, Nevada, Canada, and Mexico. This doctrine also led to a hierarchy of building types from temples and tabernacles to meetinghouses and tithing offices. Their built environment stands as a monument to a unique utopian society that not only survived but continues to flourish where others have become historical or cultural curiosities. Hamilton's account augmented by 135 original and historical photographs provides a fascinating example of how religious teachings and practices are expressed in planned communities and architecture types.

The Early Temples of the Mormons Laurel B. Andrew, 1978-06-30 This book is a study of the six temples which the Church of Jesus Christ of the Latter day Saints constructed in the nineteenth century. Though sharing the characteristics of various revival styles, the buildings demonstrate a progressive modification of these styles so as to express the functions of the temples and to reflect the theology and politics of the Mormons. The four temples in Utah designed by the church president Brigham Young and his builder architects symbolize the merging of spiritual and temporal concerns and the author believes were meant to play an instrumental role in the transformation of America into a millennial kingdom of God and a second Garden of Eden. Thus the temples are studied within the specific context of Mormonism and the broader spectrum of American cultural history as well. The account begins in Ohio where the believers in Joseph Smith's restored gospel erected a temple resembling the New England meetinghouse in form and use. It follows the Mormons to Nauvoo, Illinois, where the second temple was built in the 1840s. The author demonstrates how the developing theology and the introduction of secret rituals began to change the meaning and the architectural form of the temple as the style and architectural symbols were incorporated on the exterior of the temple. From Illinois the Mormons moved to Utah where four temples were built. The most important at Salt Lake City is discussed in detail. The author evaluates the contributions of Brigham Young to its design, illustrates and discusses the drawings of the architect, and offers an interpretation of the symbolism of the building. She also discusses the attempt of the Mormons to establish an independent Kingdom of God in preparation for the Second Coming of Christ and relates the Salt Lake City temple and the other Utah buildings to this effort. Her conclusion is that the Salt Lake City temple was to have a civic as well as religious function as the governmental center of the Kingdom of God. The other three Utah temples were intended to extend the authority of the Mormon government throughout Utah.

Building Zion Thomas Carter, 2015 Focusing on a network of small towns in Utah, Thomas Carter explores the key elements of the Mormon cultural landscape: town planning, residences, including polygamous houses, stores, and other nonreligious buildings, meetinghouses, and temples. Zion Carter demonstrates is an evolving entity reflecting the church's shift from group oriented millenarian goals to more individualized endeavors centered on personal salvation and

exaltation and displaying a unique blending of sacred and secular spaces *The Oxford Handbook of Mormonism* Terryl L. Givens, Philip L. Barlow, 2015-09-01 Winner of the Best Anthology Book Award from the John Whitmer Historical Association Winner of the Special Award for Scholarly Publishing from the Association for Mormon Letters Scholarly interest in Mormon theology history texts and practices what makes up the field now known as Mormon studies has reached unprecedented levels making it one of the fastest growing subfields in religious studies In this volume Terryl Givens and Philip Barlow two leading scholars of Mormonism have brought together 45 of the top experts in the field to construct a collection of essays that offers a comprehensive overview of scholarship on Mormons The book begins with a section on Mormon history perhaps the most well developed area of Mormon studies Chapters in this section deal with questions ranging from how Mormon history is studied in the university to the role women have played over time Other sections examine revelation and scripture church structure and practice theology society and culture The final two sections look at Mormonism in a larger context The authors examine Mormon expansion across the globe focusing on Mormonism in Latin America the Pacific Europe and Asia in addition to the interaction between Mormonism and other social systems such as law politics and other faiths Bringing together an impressive body of scholarship this volume reveals the vast range of disciplines and subjects where Mormonism continues to play a significant role in the academic conversation The Oxford Handbook of Mormonism will be an invaluable resource for those within the field as well as for people studying the broader ever changing American religious landscape

Excavating Mormon Pasts Newell C. Bringhurst, Lavina Fielding Anderson, 2004-08-31 Winner of the Special Book Award from the John Whitmer Historical Association Excavating Mormon Pasts assembles sixteen knowledgeable scholars from both LDS and the Community of Christ traditions who have long participated skillfully in this dialogue It presents their insightful and sometimes incisive surveys of where the New Mormon History has come from and which fields remain unexplored It is both a vital reference work and a stimulating picture of the New Mormon History in the early twenty first century *Utah's Historic Architecture, 1847-1940* Thomas Carter, Peter Goss, Peter L. Goss, 1988 *Mormon Temple Architecture and the Spaces of Ritual* Michael Henry Marcheschi, 1999 Temples are the most significant religious buildings of The Church of Jesus Christ of Latter day Saints In the early days of the church temples were used for general worship and congregation These temples represented the spiritual and physical heart of the communities in which they were built As the theology of the church evolved temples took on a more restricted function the performance of sacred ordinances Mormons believe that these ordinances are necessary to prepare individuals to return to the presence of God In the church today the temple is seen as the pinnacle of a member's worship and to attend the temple a sign of one's commitment and worthiness In this thesis I propose that as the most significant structures built by the church temples could be designed such that the form and arrangement of the ritual spaces reinforce to a greater degree the clarity of Mormon doctrine and the spiritual quality of the temple ordinances In addition the design of our temples could be more religiously symbolic and clear yet cultural ly

neutral thus allowing for local design intervention and participation from the church's diverse membership. This thesis has been the vehicle to explore the possibilities of Mormon temple architecture. The final product is not a building model to be replicated en masse but rather the design of a building type that has the potential to inspire numerous variations. What is most important is that the spaces of ritual are clearly defined and meaningfully associated so that the temple patron can be taught and inspired in the House of the Lord.
