## **Nationalism And Particularity:**

Nationalism and Particularity Andrew Vincent, 2002-05-07 Examining nationalism in two ways this study first draws out the ideological connections and associations of nationalism by analyzing its relationship to a series of key political concepts theories and practices sovereignty the nation state citizenship liberal theory patriotism communitarianism multiculturalism and cosmopolitanism Secondly it looks at the drift to particularity in political debates by assessing nationalism as a key example of particularity

The Oxford Handbook of Political Ideologies Michael Freeden, Lyman Tower Sargent, Marc Stears, 2013-08-15 This is the first comprehensive volume to offer a state of the art investigation both of the nature of political ideologies and of their main manifestations The diversity of ideology studies is represented by a mixture of the range of theories that illuminate the field combined with an appreciation of the changing complexity of concrete ideologies and the emergence of new ones Ideologies however are always with us The Handbook is divided into three sections The first is divided into three sections The first reflects some of the latest thinking about the development of ideology on an historical dimension from the standpoints of conceptual history Marx studies social science theory and history and leading schools of continental philosophy The second includes some of the most recent interpretations and theories of ideology all of which are sympathetic in their own ways to its exploration and close investigation even when judiciously critical of its social impact This section contains many of the more salient contemporary accounts of ideology The third focuses on the leading ideological families and traditions as well as on some of their cultural and geographical manifestations incorporating both historical and contemporary perspectives Each chapter is written by an expert in their field bringing the latest approaches and understandings to their task The Handbook will position the study of ideologies in the mainstream of political theory and political analysis and will attest to its indispensability both to courses on political theory and to scholars who wish to take their understanding of ideologies in new directions

Various, 2021-06-23 From votes to strikes to street violence politics is intrinsically geographical Many of the books in this set originally published between 1964 and 1990 illustrate that the social contexts provided by localities are crucial in defining distinctive political identities and subsequent political activities

*Metaphysical Problems, Political Solutions* Asaf Z. Sokolowski, 2010-12-16 In defiance of the predominant pattern of reading liberal political thought in isolation from the metaphysical and theological investigations of its classic thinkers *Metaphysical Problems Political Solutions* Self State and Nation in Hobbes and Locke seeks to place their writings in context Asaf Z Sokolowski demonstrates that the political measures offered by theorists to remedy the social state of instability known as the state of nature are intrinsically connected to distinctive metaphysical conceptions of the relationship between order and individuation In each system of thought the

origin and role of the self are determined by a particular conception of a created and evolving universal order In turn each version of order must contend with the vital question of how the individual is able to sustain a continuous identity Thus contrary to conventional thinking it becomes apparent that the political theory developed by thinkers like Hobbes and Locke is predicated less on a security threat than on a debilitating insecurity concern derived from ontological identity difficulties This identity focused reinterpretation of the liberal tradition transforms differences between key thinkers previously reduced to nuance into pivotal discords that shed a new light on the theoretical underpinnings of the self the state and the nation As such it will be valuable to scholars of political theory metaphysics theology social science and law      **Nationalism and**
