Nations And Politics In The Soviet Successor States:

Nations and Politics in the Soviet Successor States I. Bremmer, 1992 **Nation-Building and Minority Politics in Post-Socialist States** David Galbreath, 2005-03-05

Despite socialism's best efforts ethnic identity remained a salient feature in Central and Eastern Europe. Not only did ethno nationalism help to bring about the fall of the socialist regimes in this region but it also characterized much of the post socialist politics. Nation Building and Minority Politics examines the issue of minority politics in post socialist states within this dual structure. In particular it offers an in depth analysis of post restoration politics in Estonia and Latvia covering four issues. First it looks at the historical context of the current group relations. Second the study explores the domestic nature of minority politics in Estonia and Latvia by looking at domestic politics and policies. Third it examines the role of the Russian Federation as an external national homeland through illustrating developments within Russian foreign policy. Finally the book analyses the role of three significant European organizations namely the OSCE, EU and the Council of Europe as agents of conditionality. Overall this study combines old and new theoretical approaches to nation building and minority politics to exhibit the changing nature of the relationship between majority minority external national homeland and international organizations in today's Europe.

Nations and Politics in the Soviet Successor States Ian Bremmer, Ray Taras, 1992-12-03 New States, New Politics Ian Bremmer, Ray Taras, 1996-12-28

Since its publication in 1993 *Nations and Politics in the Soviet Successor States* edited by Ian Bremmer and Ray Taras has established itself internationally as the genuinely comprehensive systematic and rigorous analysis of the nation and state building processes of the fifteen states that grew out of the 1991 collapse of the Soviet Union. *New States New Politics Building the Post Soviet Nations* was first published in 1997 and succeeds and replaces the editors' earlier book with a fresh collection of specially commissioned studies from the world's foremost specialists. Far from eradicating tensions among the former Soviet peoples the disintegration of empire saw national minorities rediscovering long suppressed identities. The contributors to *New States New Politics* bring together historical and ethnic backgrounds with penetrating political analysis to offer an intriguing record of the different roads to self assertion and independence being pursued by these young nations.

Where Nation-States Come From Philip G. Roeder, 2012-01-09

To date the world can lay claim to little more than 190 sovereign independent entities recognized as nation states while by some estimates there may be up to eight hundred more nation state projects underway and seven to eight thousand potential projects. Why do a few such endeavors come to fruition while most fail? Standard explanations have pointed to national awakenings nationalist mobilizations economic efficiency military prowess or intervention by the great powers. *Where Nation States Come From* provides a compelling alternative account one that incorporates an in depth examination of the Russian Empire the Soviet Union and their successor states. Philip Roeder argues that almost all successful nation state projects have been associated with a particular political institution prior to independence the segment state a jurisdiction defined by both human and

territorial boundaries Independence represents an administrative upgrade of a segment state Before independence segmental institutions shape politics on the periphery of an existing sovereign state Leaders of segment states are thus better positioned than other proponents of nation state endeavors to forge locally hegemonic national identities Before independence segmental institutions also shape the politics between the periphery and center of existing states Leaders of segment states are hence also more able to challenge the status quo and to induce the leaders of the existing state to concede independence Roeder clarifies the mechanisms that link such institutions to outcomes and demonstrates that these relationships have prevailed around the world through most of the age of nationalism

Geography and Transition in the Post-Soviet Republics Michael J. Bradshaw, 1997 This collection of essays follows on from the Soviet Union A New Regional Geography published in 1991 It examines the events that have taken place since 1994 in the context of theoretical developments in contemporary geography Written by authorities from all over the world it brings us up to date with the events in the former Soviet Union and uncertainty over the future

Political Construction Sites Pal Kolsto, 2018-02-19 The dissolution of the Soviet Union has provided scholars with tremendously rich material for the study of comparative nation building Not since the

decolonization of Africa in the 1960s have so many new states been established in one stroke in one region The post Soviet states moreover have all the necessary prerequisites for fruitful comparison a number of similarities but also significant differences in terms of size culture and recent history In order to survive in the long run modern states normally must have a population that possesses some sense of unity Its citizens must adhere to some common values and common allegiance towards the same state institutions and symbols This does not mean that all inhabitants must necessarily share the same culture but they should at least regard themselves as members of the same nation Strategies to foster this kind of common nationhood in a population are usually referred to as nation building After a decade of post Soviet nation building certain patterns are emerging and not always the most obvious ones Some states seem to manage well against high odds while others appear to be disintegrating or sinking slowly into oblivion To a remarkable degree the former Soviet republics have chosen different models for their nation building This book examines the preconditions for these endeavors the goals the state leaders are aiming at and the means they employ to reach them

Russia and the Commonwealth of Independent States 2009 M. Wesley Shoemaker, 2009 The Nationalities Question in the Post-Soviet States Graham Smith, 1996 This volume examines nationality and ethnic relations in the post Soviet states It takes account of the changes since the break up of the Soviet Union in 1989 provides overviews of nationalities policy in the Soviet period and the post Soviet states and covers the different nationalities

Politics and the Slavic Languages Tomasz Kamusella, 2021-06-17 During the last two centuries ethnolinguistic nationalism has been the norm of nation building and state building in Central Europe The number of recognized Slavic languages in line with the normative political formula of language nation state gradually tallied with the number of the Slavic nation states especially after the breakups of Czechoslovakia the Soviet Union and Yugoslavia But in the current age of borderless cyberspace regional and minority Slavic languages are freely standardized and used even when state authorities disapprove As a result since the turn of the 19th century the number of Slavic languages has varied widely from a single Slavic language to as many as 40 Through the story of Slavic languages this timely book illustrates that decisions on what counts as a language are neither permanent nor stable arguing that the politics of language is the politics in Central Europe The monograph will prove to be an essential resource for scholars of linguistics and politics in Central Europe

Politics of Language in the Ex-Soviet Muslim States Jacob M. Landau, Barbara Kellner-Heinkele, 2001 The subject of this particular book is of great interest today for three major reasons first the six republics of Central Asia strongly shaped by Turkic languages Tajik is a variety of Persian but Turkic influence is still there and Islam are relatively unknown secondly their respective language policies which they say are central for development and modernisation may show us much about the creative potential of choices of language anywhere in the world as well as

problems connected with implementation third these two scholars and their local assistants harvested much previously unpublished empirical data which they have presented to readers in a clear framework The conclusion very well relates language policies in these states to broad issues of nation building language planning multilingualism and other concepts
