## **Natural Agency An Essay On The Causal Theory Of Action:**

**Natural Agency** John Christopher Bishop, 1989 From a moral point of view we think of ourselves as capable of responsible actions From a scientific point of view we think of ourselves as animals whose behavior however highly evolved conforms to natural scientific laws Natural Agency argues that these different perspectives can be reconciled despite the skepticism of many philosophers who have argued that free will is impossible under scientific determinism This skepticism is best overcome according to the author by defending a causal theory of action that is by establishing that actions are constituted by behavioral events with the appropriate kind of mental causal history He sets out a rich and subtle argument for such a theory and defends it against its critics Thus the book demonstrates the importance of philosophical work in action theory for the central metaphysical task of understanding our place in nature

**Contemporary Action Theory Volume 1: Individual Action** Ghita Holmström-Hintikka, R. Tuomela, 2013-04-17 Contemporary Action Theory Volume I Individual Action is concerned with topics in philosophical action theory such as reasons and causes of action intentions freedom of will and of action omissions and norms in legal and ethical contexts as well as activity passivity and competence from medical points of view Cognitive trying freedom of the will and agent causation are challenges in the discussion on computers in action The Volume consists of contributions by leading experts in the field written specifically for this volume No comparable volume currently exists

**Philosophy of Action** Sarah Paul, 2020-12-29 This book offers an accessible and inclusive overview of the major debates in the philosophy of action It covers the distinct approaches taken by Donald Davidson G E M Anscombe and numerous others to answering questions like what are intentional actions and how do reasons explain actions Further topics include intention practical knowledge weakness and strength of will self governance and collective agency With introductions conclusions and annotated suggested reading lists for each of the ten chapters it is an ideal introduction for advanced undergraduates as well as any philosopher seeking a primer on these issues

**Action Reconceptualized** David K. Chan, 2016-05-11 The concept of action that requires philosophical analysis is one that concerns behavior characteristically found in humans In Action Reconceptualized Human Agency and Its Sources David K Chan examines the sources of human agency that are proposed in causal theories of action namely desire intention and trying and distinguishes them from each other in terms of their roles in practical reasoning and motivation He conceptualizes them in relation to each other in a way that is consistent and useful for answering a number of questions that are central to the philosophy of action The action theory in this book addresses the need to understand human agency for its own sake but it also serves another purpose When the philosopher Elizabeth Anscombe stressed the need to do philosophy of action before doing ethical theory what she meant was that moral philosophers should first work out a proper account of the relationship between the inner states of a person and the actions that she performs This book provides such an account and makes the case that it is desire rather than intention that is the basis for the ethical evaluation of an agent Action Reconceptualized will be of particular

interest to students and scholars doing research in action theory and ethics as well as to those working outside of philosophy in psychology and cognitive science

**The Shape of Agency** Joshua Shepherd, 2021 In this book Shepherd offers a perspective on the shape of agency by offering interlinked explanations of the basic building blocks of agency as well as its exemplary instances

**Understanding Human Agency** Erasmus Mayr, 2011-09-15 Our self understanding as human agents includes a commitment to three crucial claims about human agency that agents must be active that actions are part of the natural order of the universe and that intentional actions can be explained by the agent's reasons for acting While all of these claims are indispensable elements of our view of ourselves as human agents they are in continuous conflict and tension with one another especially once one adopts the currently predominant view of what the natural order must be like One of the central tasks of philosophy of action consists in showing how despite appearances these conflicts can be resolved and our self understanding as agents be vindicated The mainstream of contemporary philosophy of action holds that this task can only be fulfilled by an event causal reductive view of human agency paradigmatically embodied in the so called standard model developed by Donald Davidson Erasmus Mayr in contrast develops a new agent causal solution to these conflicts and shows why this solution is superior both to event causalist accounts and to Von Wright's intentionalism about agency He offers a comprehensive theory of substance causation on the basis of a realist conception of powers which allows one to see how the widespread rejection of agent causation rests on an unfounded Humean view of nature and of causal processes At the same time Mayr addresses the question of the nature of reasons for acting and complements its substance causal account of activity with a non causal account of acting for reasons in terms of following a standard of success
