National And Ethnic Movements:

National and Ethnic Movements Jacques Dofny, Akinsola A. Akiwowo, 1980 **National and Ethnic Movements** Jacques Dofny, Akinsola A. Akiwowo, 1980 **Women Fighters in the Kurdish National Movement** Mustafa Kemal Topal, 2024-02-22 The Kurdistan Workers Party PKK is a Kurdish militant political organization and armed guerrilla movement Designated a terrorist organization by Turkey the EU and the US it seeks self determination from Turkey But this book examines the other changes it generates in society focusing on how it has become a platform for shifts in gender politics through its women fighters Based on fieldwork undertaken in Iraq Syria and Europe including in depth interviews and participant observation within women s camps the book examines Kurdish women fighters motivations to join the PKK as well as their personal life stories and views on gender patriarchy and ethnic minority experiences This is the largest ethnographic study on the PKK to date and the book argues that in addition to seeking their nation s struggle for survival and a democratic society Kurdish women fighters are driven by the prospect of improving conditions for themselves and for women across the entire region *The Soviet Union and National Liberation Movements in the Third World* Galia Golan, 2022-12-28 The Soviet Union and National Liberation Movements in the Third World 1988 is a systematic comparison of Soviet theory about and actual behaviour toward movements for national liberation in the Third World In this definitive study Professor Golan demonstrates that Soviet behaviour toward such movements is consistent with Soviet theory as stated in the writings and speeches of high level influential within the Party military and academic communities In so doing she advances our understanding of the rules of thumb that Soviet leaders appeared to follow in deciding whether and how to assist the varied types of anti imperialist and separatist movements in the developing world The first part of the book provides a detailed analysis of the various schools of thought among Soviet writers concerning different aspects of national liberation movements and the second part analyses actual Soviet behaviour toward numerous movements around the world *National Identities and Ethnic Minorities in Eastern Europe* Ray Taras, 2016-07-27 This volume provides a cross national analysis of the changing identities of various national and ethnic groups their new political influence in the emergent democracies and their efforts to revive suppressed cultures It begins with a theoretical analysis of the concepts of national identity and ethnicity It features case studies of contemporary Belarussian Polish and Ukrainian national identities before turning to a study of Eastern Europe s hidden ethnic minorities like the Finno Ugric peoples in Russia the Lemkos in Poland and the Gypsies in Bulgaria **Game of Mirrors: Centre-Periphery National Conflicts** Francisco Letamendia, 2019-07-30 This title was first published in 2000 Nationalism and the national question have represented a problem since the early years of the 19th century Understanding these phenomena represents a challenge for political science because the nation is not a natural phenomenon rather it is the consequence of nationalism Attempts to reduce nationalism to one or several factors have been unsuccessful it has multiple factors that are variable in space and time

Nationalism is a problem of beliefs and conscience linked to the historical action of nationalist groups A second difficulty derives from the distinction between nationalism of the dominant and nationalism of the oppressed The majority of political theorists now believe that these centre and periphery nationalisms are different and therefore adversaries Using first hand experience of Basque separatism as a starting point the author adds to it with the main manifestations of this phenomenon around the world

Ethnic Insurgency and National Integration Mahfuzul Haque,1997 *Language Policy and National Unity* William R. Beer,James Jacob,1985-06 The central focus of each chapter is language policy and how it accomplishes or fails to accomplish the task of maintaining national unity in the face of linguistic diversity Included among the nations considered are examples of postcolonial cultures as well as nations that have sheltered linguistic minorities within their borders throughout their history countries fragmented into tribal groups and those divided by a plethora of local dialects

Nationalism, National Identity and Movements Joel Jensen,Dale Carter,2018 *Nationalism National Identity and Movements* begins by presenting an examination of how forced migratory movements although seeming to question traditional national principles of the sovereign state as well as undermining or even eroding nationalist value systems ended up strengthening the power of the nation states during the period after the Second World War In particular it will investigate how different waves of refugees contributed to the consolidation of one specific type of nationalism the ethnic one Next the authors analyse the role of national narratives in the development of national identity This interdisciplinary approach offers a more complete and

analytical understanding of how narratives of national identity are produced transmitted and finally consumed by the members of a nation Also in this book detailed theoretical rationale for the relationships between identification and threat perceptions is presented exploring the issues related to causal direction and links to attitudes toward immigrants and immigration policies Although having a national identity on its own is not troubling possessing an inflated sense of national identity referred to as national group narcissism may lead to biased perceptions of intergroup relations Following this the authors describe three different types of artworks and the identities associated with each artist in order to reveal the complex process through which Korean identity is formed This research identifies the first type of artist as one who left South Korea as an adult in order to be deterritorialized from the given territory and the individual s Koreanness has been one rediscovered by dialectical play with the Other Usage of the colonial discourse is proposed as a way to represent social relationships providing additional opportunities for the analysis of the political situation in Russia Thus the work of contemporary intellectuals who identify themselves as Russian nationalists is analyzed Conclusions are made regarding the fundamental conflictual nature of intellectuals The construction of a unified Mexican national identity is depicted in the concluding chapter in a territory originally divided by adversarial ethnic groups into one nation glued by a common language and history The authors conclude that nationalism in Mexico must be understood within educational historical and contextual influences to assess costs and benefits
