Outbreak Culture Pardis Sabeti, Lara Salahi, 2021-09-28 An award winning genetic researcher and a tenacious journalist examine each phase of the Ebola epidemic in West Africa the largest and deadliest of its kind Their postmortem identifies factors that kept key information from reaching doctors complicated the government's response to the crisis and left responders unprepared for the next outbreak

Outbreak Davis Bunn, 2019-04-02 The waters off the West African coast are a menacing red full of algae thick enough to stand on in places In nearby villages mysterious deaths start to occur and the panic mounts But before an alarm can be sounded the sea currents shift the algae vanishes and the deaths stop Everyone is relieved when things return to normal and local government officials are happy to sweep the publicity nightmare under a rug An American biological researcher Avery Madison is dispatched by his employer to piece together exactly what happened having long feared an ecological disaster just like this could occur He's had little evidence to go on before now and what he finds in West Africa is rapidly disappearing But Avery knows the danger hasn't disappeared it has just moved on When parts of the Caribbean start turning a familiar red right before hurricane season kicks into high gear the implications are clear If Avery and his colleagues can't convince the world of what's about to happen toxic destruction could be loosed on American soil Will their efforts prove too late

Far from Safe Regina Lustig, DeNene Banger, 2020-06-21 *Far from Safe* This book is an inside look at the public health workers whose job it is to keep us all safe What is it like to live and work inside a deadly disease outbreak In *Far from Safe* two public health nurses write vividly of the experience from the first day that begins with the death of an infant through a frightening succession of days and weeks where new cases grow by the hour This outbreak in Coeur d Alene Idaho quickly reaches a scale that overwhelms the capacity of the local health department to respond But the health department is not the only casualty of the epidemic In 1997 an outbreak of whooping cough in Coeur d Alene Idaho started with the shocking death of an infant In the race to stop the spread of disease and protect lives the public health system was completely overwhelmed Laboratories couldn't process tests fast enough Local doctors were unable to take care of their patients Testing supplies ran out Pharmacies ran out of drugs The public health workers that stood between the community and the disease were sickened and taken off of the front lines When the outbreak ends there is a search for answers What can we do the next time What can create a stronger more agile public health system The authors describe their search for meaning and understanding within the confines of the real world
