Introduction to Islamic Economics Theory and Application provides an overview of the organizing principles and fundamentals of an Islamic economy With deep discussion of the characteristics rationale key institutions objectives and instruments at work the book addresses the core economic principles underlying a system based on the foundational teachings of Islam and examines the implications for economic policies Social welfare economic justice market functionality efficiency and equity are explored from an Islamic perspective and the role and instruments of fiscal and monetary policy in Islamic systems are used to illustrate contemporary applications Universities around the globe are offering courses on Islamic economics and finance but despite the industry s rapid growth most research has been focused on the financial principles rather than underlying economic principles The first book of its kind Introduction to Islamic Economics brings all the key concepts together into one reference volume By outlining the ways in which Islamic finance and Islamic economics interrelate this book can help readers to Develop an understanding of the Islamic economic system and its institutional scaffolding Differentiate between the major characteristics of the dominant conventional economy and one based on the fundamental sources of Islam Understand the conditions that must be met for a just well balanced stable and growing economy Clarify the role of State public policy and risk sharing in the Islamic financial system The Islamic financial system is expanding quickly and those looking to increase their relevance in a changing economic landscape must get up to speed Introduction to Islamic Economics provides a comprehensive overview of underlying economic system offering a deeper understanding of the feature of the system This book is an excellent complement to Introduction to Islamic Finance 2E by Iqbal and Mirakhor

**Outlines of Islamic economics** , 1994      *Methodology of Islamic Economics* Necmettin Kizilkaya, 2019-11-05 In its pursuit to equip the reader with a basic knowledge of Islamic economics this book divulges the micro foundations of the discipline and highlights the predominant schools of thought that exist in the field It explains in simple terms what Islamic economics entails and how it can be studied as a science in relation to the Holy Quran the Sunnah and the Islamic intellectual tradition based on these two sources The book familiarizes the reader with knowledge of the basic maxims of the discipline It then establishes the arguments that are presented by the proponents of religion based economics specifically Islam and apprises readers about the aforementioned schools as they exist A number of chapters consider the dimension of the dilemmas the discipline is facing and the chronological progress of the field is reviewed hence providing a comprehensive overview of the topic The book deals with the issues about the origins of Islamic economics the basic methodological questions the use of the opportunities offered by fiqh in the methodological discussions and the main problems arising from the encounter with other cultures and civilizations It offers practical solutions despite the differing

schools of thought not unlike the development of conventional Economics where radical differences between Keynesian Classical and Monetarist approaches existed. It concludes by incorporating some of the finest works that explain to the reader how Islamic economics may progress as a discipline. This guide will provide both students and researchers in Comparative Economic Studies Islamic Economics and Islamic Finance with an essential overview of the field. Outlines of Islamic economics, 1977. **Handbook of Ethics of Islamic Economics and Finance** Abbas Mirakhor, Zamir Iqbal, Seyed Kazem Sadr, 2020-04-20. Since the financial crisis of 2007-2008, a renewed discussion on the ethics and finance is being examined from different dimensions: finance for good, society responsible finance, ethical finance, financial crimes, and financial repression. The principal objective of this Handbook on Ethics of Islamic Economics and Finance is to provide a deeper understanding of the ethical underpinning of Islamic economics and finance. The reader will notice that the Handbook reflects a diversity of views on the subject of economic and business ethics in Islam across the intellectual spectrum of Muslim thought over the globe. Handbook attempts to find answers to some questions concerning the definition and characteristics of the ethical system in Islam: What is its goal and how do its rules and practices ensure welfare for individuals and society? Are the moral principles universal and invariable or do they change and adapt with the social changes of communities and progress in science and technology? Is the present generation accountable for the welfare of future generations? Where is the boundary between law and ethics and who guarantees their adoption and implementation?

**Contemporary Islamic Economic Thought** Mohamed Aslam Haneef, 1995. Islamic Economics: Principles and Analysis Moutaz Abojeib, Muhammad Anas Zarka, Muhammad Fahim Khan, Muhammad Irwan Ariffin, Muhammad Syukri Salleh, Rifki Ismail, Rokiah Alavi, Ruzita Mohd Amin, Saiful Azhar Rosly, Selamah Abdullah Yusof, Ugi Suharto, Zubair Hasan, Adam Abdullah, Adam Ng, Akhmad Affandi Mahfudz, Ataul Huq Pramanik, Gairuzazmi Mat Ghani, Hafas Furqani, Irum Saba, Izzyani Zulkifli, Kasule Twaha Ahmed, Maya Puspa Rahman, Mohammed Obaidullah, Mohd Azmi Omar, Mohd Nahar Mohd Arshad, Mohd Nizam Barom, Mohd-Pisal Zainal, Monzer Kahf, 2018-12-01. With the impressive emergence of Islamic finance as a branch of Islamic economics, the need for a solid knowledge base that encompasses theories, thoughts, and applications related to the subject increased in importance. However, writing about Islamic economics is a great challenge due to the differences in opinion on many of its issues. This includes methodologies for determining the Islamic perspective on economic concepts and issues as well as applicable solutions for today's economic and social problems. It is further argued that Islamic economics topics are not as clear as those in conventional economics as they have their own religious, spiritual, and social dimensions. The points of controversy have generated lengthy discussions. Moreover, Islamic economics encompasses a vast array of topics and approaches from the purely theoretical, which may include philosophy or religious ideas, to mathematical and quantitative analyses. We tried our best throughout this textbook to simplify, clarify, and summarise these concepts to make them accessible to all readers, including students, practitioners, academics, and even interested non-specialists. This

textbook presents discusses and analyses various topics and issues related to Islamic economics ranging from philosophical epistemological and methodological to microeconomic and macroeconomic perspectives In this endeavour the social aspect of Islamic economics an essential part of the discipline is not neglected The textbook compares Islamic ideas and concepts related to economics with those in conventional economics to highlight Islamic economics as a distinct field of knowledge with an emphasis on the ethical and social aspects The authors have tried their level best to explain the theoretical concepts as simply as possible without ignoring today s realities and without compromising Shar ah principles and objectives One of the main objectives of the book is to provide the reader with Islamic economic ideas and solutions that are realistic and applicable within the current highly globalised economic and business environment which is largely dominated by conventional interest based systems and institutions Despite being written for an elementary level audience this textbook can also be beneficial to a wide range of specialist and non specialist readers and seekers of knowledge For those specialising in Islamic economics it is an appropriate source of reference to gain an overview on different topics relating to the foundations of Islamic economics At this point however it must be mentioned that each topic deliberated upon by its nature would require a book on its own to cover all its aspects Therefore further exploration is required for Islamic economics specialists A list of references and recommended readings is provided for that purpose at the end of each chapter On the other hand students of mainstream economics finance and other academic majors will find this textbook an excellent resource for comprehensive knowledge of Islamic economics and its related issues Universities may benefit from the different topics presented in this textbook in designing or preparing their economics courses at different levels based on their own curriculums and classes This textbook could be used at the undergraduate level or even for a master s level economics or Islamic economics course especially in an Islamic banking and finance programme or for an MBA having a specialisation in Islamic banking and finance where an economics or Islamic economics course is offered Furthermore practitioners and interested readers who are seeking essential and simple knowledge about Islamic economics will also find this textbook to be a helpful guide It is important to mention here that Islamic economics literature shows wide differences among the scholars in almost every subtopic Presenting all opinions within a limited number of pages is almost impossible However with the great contribution of more than 60 scholars from a wide span of countries and from various economic schools this book represents an important attempt to present the topics and issues from various perspectives with the maximum objectivity possible Through comprehensive content editing the editors have striven to improve the flow of arguments remove inconsistencies and put the ideas together in as coherent a manner as possible However the editors acknowledge that some biases and overlaps may still persist
