Lucretius On Atomic Motion A Commentary On De Rerum Natura Lines 1 33:

Natural Theology in the Scientific Revolution Katherine Calloway, 2015-10-06 In the seventeenth century scientific discoveries called into question established Christian theology It has been claimed that contemporary thinkers contributed to this conflict model by using the discoveries of the natural world to prove the existence of God Calloway challenges this view by close examination of five key texts of the period

The Oxford Handbook of Epicurus and Epicureanism Phillip Mitsis, 2020 Most complete and detailed account of all areas of Epicurus's philosophy in English Includes a detailed and authoritative account of Philodemus Examines later historical figures who were influenced by Epicureanism Explores the Herculaneum papyri and the inscription of Diogenes of Oenoanda Book jacket

Structuring the Cosmos in Valerius Flaccus's Argonautica Darcy A. Krasne, 2025-11-22 Structuring the Cosmos in Valerius Flaccus's Argonautica explores motifs of cosmology meteorology and discordia in the Flavian epic It demonstrates how Valerius especially by means of intertextual allusion draws on theories of natural science and philosophy an eclectic mix of Stoicism Epicureanism and Empedoclean doctrine on an ethical as well as a cosmological level to construct an unstable cosmos that is on multiple levels both prone to dissolution and a breeding ground for cycles of civil war The book argues that Valerius's intertextual practices can be read as a form of cosmopoetics in that he uses language images and ideas from earlier literature to collectively build a picture of the cosmos's operation within his poem At the study's heart and it is argued of Valerius's epic are the elements of air and fire as aspects of nature as personified mythological beings and as active cosmic forces functioning in parallel across physical and conceptual strata from the subterranean to the celestial from the social to the macrocosmic Looking to move beyond pessimistic and recuperative readings of the epic Structuring the Cosmos reevaluates Valerius's engagement with the Flavian literary philosophical and historical climate especially as a poet of civil war

The Feminine Symptom Emanuela Bianchi, 2014-09-15 The first English language study of Aristotle's natural philosophy from a continental perspective the Feminine Symptom takes as its starting point the problem of female offspring If form is transmitted by the male and the female provides only matter how is a female child produced Aristotle answers that there must be some fault or misstep in the process This inexplicable but necessary coincidence *symptoma* in Greek defines the feminine symptom Departing from the standard associations of male activity form and female passivity matter Bianchi traces the operation of chance and spontaneity throughout Aristotle's biology physics cosmology and metaphysics and argues that it is not passive but aleatory matter unpredictable ungovernable and acting against nature and teleology that he continually allies with the feminine Aristotle's pervasive disparagement of the female as a mild form of monstrosity thus works to shore up his polemic against the aleatory and to consolidate patriarchal teleology in the face of atomism and Empedocleanism Bianchi concludes by connecting her analysis to recent biological and materialist political

thinking and makes the case for a new antiessentialist politics of aleatory feminism *Genealogy of Popular Science* Jesús Muñoz Morcillo, Caroline Y. Robertson-von Trotha, 2020-10-27 Despite the efforts of modern scholars to explain the origins of science communication as a social rhetorical and aesthetic phenomenon most researchers approach the popularization of science from the perspective of present issues thus ignoring its historical roots in classical culture along with its continuities disruptions and transformations This volume fills this research gap with a genealogically reflected introduction into the popularization of science as a recurrent cultural technique The category popular science is elucidated in interdisciplinary and diachronic dialogue discussing case studies from all historical periods Classicists archaeologists medievalists art historians sociologists and historians of science provide the first diachronic and multi layered approach to the rhetoric techniques aesthetics and societal conditions that have shaped the dissemination and reception of scientific knowledge *Epicurus in the Enlightenment* Neven Leddy, Avi Lifschitz, 2009 Eighteenth century Epicureanism is often viewed as radical anti religious and politically dangerous But to what extent does this simplify the ancient philosophy and underestimate its significance in Enlightenment writing Through a pan European analysis of Enlightenment centres from Scotland to Russia via the Netherlands France and Germany contributors argue that elements of classical Epicureanism were appropriated by radical and conservative writers alike They move beyond literature and political theory to examine the application of Epicurean ideas in domains as diverse as physics natural law and the philosophy of language drawing on the work of both major figures Diderot Huetius Smith and Hume and of lesser known but equally influential thinkers Johann Jacob Schmauss and Dmitrii Anichkov This unique collaboration bringing together historians philosophers political scientists and literary scholars provides rich and varied insights into the different strategic uses of Epicureanism in the eighteenth century
