## Our Planet:

*A Life on Our Planet* Sir David Attenborough, 2020-10-06 Goodreads Choice Award Winner for Best Science Technology Book of the Year In this scientifically informed account of the changes occurring in the world over the last century award winning broadcaster and natural historian shares a lifetime of wisdom and a hopeful vision for the future See the world Then make it better I am 93 I've had an extraordinary life It's only now that I appreciate how extraordinary As a young man I felt I was out there in the wild experiencing the untouched natural world but it was an illusion The tragedy of our time has been happening all around us barely noticeable from day to day the loss of our planet's wild places its biodiversity I have been witness to this decline *A Life on Our Planet* is my witness statement and my vision for the future It is the story of how we came to make this our greatest mistake and how if we act now we can yet put it right We have one final chance to create the perfect home for ourselves and restore the wonderful world we inherited All we need is the will to do so *Earth's Wonders: A Guide to Our Planet's Diverse Ecosystems* Parker Gillespie,

*Our Planet! There's No Place Like Earth* Stacy McAnulty, 2022-04-05 From writer Stacy McAnulty and illustrator David Litchfield *Our Planet There's No Place Like Earth* is a nonfiction picture book about the Earth told from the perspective of Earth herself Meet Earth Planet Awesome And your awesome home Actually Earth is home to all the plants and all the animals in the solar system including nearly eight billion people Humans have accidentally moved Earth's climate change into the fast lane and she needs your help to put on the brakes Earthlings need Earth and Earth needs Earthlings so let's save Earth together With characteristic humor and charm Stacy McAnulty channels the voice of Earth in this next celestial autobiography in the Our Universe series Rich with kid friendly facts and beautifully brought to life by David Litchfield this is an equally charming and irresistible picture book

*Our Planet, Its Past and Future* William Denton, 1879 *The Death of Our Planet's Species* Martin Gorke, 2013-02-22 The present rate and extent of species extinction estimated by some scientists as one species every 20 minutes are unprecedented in the history of mankind Human activities are responsible for nearly all species loss yet ethical aspects of this crisis are rarely mentioned Any concern expressed tends to be over potentially valuable resources information for scientists or compounds that could be used in new medicines that are lost when a species disappears In *The Death of Our Planet's Species* Martin Gorke argues that such a utilitarian perspective is not only shortsighted but morally bankrupt Holding doctoral degrees in both ecology and philosophy Gorke is uniquely qualified to examine the extinction crisis from both scientific and philosophical perspectives He offers a wide ranging review of the literature on the subject drawing together those two lines of reasoning that are almost always pursued separately After critical examination of the current state of relevant ecological knowledge Gorke presents a carefully considered case for attributing intrinsic value to all of nature including all species At the heart of his argument is an analysis of the concept of morality According to this analysis the universal character of morality does not permit us to establish limits of moral considerability More precisely every act of

exclusion from the moral community is an arbitrary act and is not compatible with a moral point of view The Death of Our Planet s Species sets forth a sound and original argument about the philosophical and ethical dimensions of species conservation Throughout the author combines a high level of theoretical sophistication with clear and straightforward writing Originally published in German this Island Press edition makes The Death of Our Planet s Species available for the first time to English speaking experts and lay readers    **Our Planet Earth** Steve Parker,1993    **Our Planet** ,2010
