Victimology and crime prevention are growing interrelated areas cutting across several disciplines. Victimology examines victims of all sorts of criminal activity from domestic abuse to street violence to victims in the workplace who lose jobs and pensions due to malfeasance by corporate executives. Crime prevention is an important companion to victimology because it offers insight and techniques to prevent situations that lead to crime and attempts to offer ideas and means for mitigating or minimizing the potential for victimization. In many ways the two fields have developed along parallel yet separate paths and the literature on both has been scattered across disciplines as varied as sociology, law, and criminology, public health and medicine, political science and public policy, economics, psychology, and human services and more. The *Encyclopedia of Victimology and Crime Prevention* provides a comprehensive reference work bringing together such dispersed knowledge as it outlines and discusses the status of victims within the criminal justice system and topics of deterring and preventing victimization in the first place and responding to victims' needs. Two volumes containing approximately 375 signed entries provide users with the most authoritative and comprehensive reference resource available on victimology and crime prevention both in terms of breadth and depth of coverage. In addition to standard entries, leading scholars in the field have contributed Anchor Essays that in broad strokes provide starting points for investigating the more salient victimology and crime prevention topics. A representative sampling of general topic areas covered includes interpersonal and domestic violence, child maltreatment and elder abuse, street violence, hate crimes, and terrorism, treatment of victims by the media, courts, police, and politicians, community response to crime victims, physical design for crime prevention, victims of nonviolent crimes, deterrence and prevention, helping and counseling crime victims, international and comparative perspectives, and more.

The Outside Child, In and Out of the Book Christine Wilkie-Stibbs, 2008-03-25 Christine Wilkie Stibbs juxtaposes the narratives of literary and actual outsider children to explore how Western culture has imagined, defined, and dealt with various marginalized children, whether orphans, homeless refugees, or victims of abuse.

Luis Vives is one of the keenest and most neglected minds of the northern Renaissance A many sided intellect and critical observer of the contemporary scene Vives contribution includes treatises on metaphysics psychology education rhetoric logic religion and social reform And it is precisely the central premise of this monograph that what links these diverse works together and turns Vives literary production into a whole larger than the sum of its parts is the author s single minded commitment to the Socratic dictum that an unexamined life is not worth living But because man s Fall caused him to lose his pristine ability to accomplish that task as an individual he must now do it in the context of a God mandated man created institution society whose origins and evolution Vives explains in Stoic terms Building on a foundation of Socratic Aristotelian optimism and Augustinian pessimism he concludes that social man can indeed reach the bonitas which alone makes beatitude possible But at a price for Vives the Skeptic insists that man must forego the use of that ratio speculativa which seduces him into thinking that he can probe into nature s being and understand his own divine nature
