Heard Your Favourite Song Glenn McDonald, 2024-06-20 If you want to know anything about how music surfaces today how to find it or how to create it you will find what you need right here Joseph Menn Washington Post writer For the first time in history almost every song ever recorded is available instantly Everywhere This book charts what music's dazzling digital revolution really means for fans and artists As a former data guru at the world's biggest streaming service Spotify Glenn McDonald reveals What the tech giants know about you How they serve up your next song Whether fans can cheat the algorithm Whether jazz is dead and ASMR is the new punk Your chances of becoming a rock star Having analysed the streams of 500 million people McDonald explores what the data tells us about music and about ourselves from the secrets of ruse in Norway to Christmas in the Philippines Statistically you have not yet heard your lifetime's favourite song This book will take you on a voyage of discovery through music's fast flowing new waters 10 bonus playlists of wonder included About the Author Glenn McDonald is expertly placed to provide a comprehensive picture of the global music industry in the 2020s Growing up in 1980s and 1990s America he was an obsessive collector of physical music CDs and vinyl albums But he soon realised the revolutionary power of digital media to make songs more widely accessible He started doing data work at the US music intelligence startup The Echo Nest which was soon acquired by Spotify He became Spotify's Data Alchemist His website Every Noise at Once everynoise.com is an unprecedented computational map of the world's music genres Reviews If you want to know anything about how music surfaces today how to find it or how to create it you will find what you need right here And you will be highly entertained and amused in the process Joseph Menn Washington Post staff writer and author of All the Rage The Rise and Fall of Shawn Fanning's Napster We used to sell CDs by the weight of pallets thanks to streaming we know how our content is consumed In this immersive book Glenn has demonstrated what we can do with this knowledge so other industries facing their Napster Moment can learn from his unrivalled first mover advantage Will Page author of Pivot and former Chief Economist of Spotify I'd say that reading this book is the next best thing to having an in depth impassioned hours long fika with Glenn McDonald about music and culture and all of the most burning topics of our time but I'd be lying It's even better This book is a true behind the scenes examination of our culture and our industry from the perspective of someone who was in the thick of it from the beginning It's a history of the streaming era written by someone who made history in the streaming era Meg Tarquinio PhD Spotify Twitch Netzwerk Music Group Throughout McDonald's book personal anecdotes and his own love of music spill out in witty conversational prose Even chapters that delve into streaming's complex finances unsurprisingly your 15 monthly fee does not go directly to your favourite artist but is split between that month's most streamed meaning that megastars such as Swift and Ed Sheeran stay at the top of the pyramid are told in layman's terms Poppie Platt The Daily Telegraph Extract CHAPTER 9 MERCENARIES AND FAN ARMIES Where there's an economic system there's probably fraud This is not a proud truth to admit about humanity but it seems to me to have been consistently historically true Money is supposed to be a bookkeeping mechanism but it becomes a goal

Fraud and cheating existed in the music business like any business long before streaming happened. Back when charts were based on people reporting sales numbers on phone calls, those people could be bribed to say different numbers. Radio DJs could be paid to pretend they were playing a song more because they just liked it. Accounting could be manipulated. Streaming doesn't necessarily make cheating easier overall, but it definitely makes it more accessible to introverts. Instead of making phone calls, you can write computer programs that pretend to be streaming music listeners. Piracy maintains a certain dastardly allure. Streaming music fraud is not to be brutally honest, the most glamorous or profitable form of dastardry. Streaming rewards accumulate in tiny micro transactions, and the software necessary to laboriously accumulate micro royalties illegitimately isn't any easier to write than legal software for which you can get paid normal salaries. It only really scales if you become a service provider selling fraud as a service, and then you're a business with business problems instead of a pirate with a rakish eye patch and the sea air in your hair. If you want to cheat your way to riches, you're better off trying to do it in junk stocks or cryptocurrencies where there's way too much money sloshing around and the distinction between legitimate behavior and cheating is fuzzy. So you might have thought that fraud wouldn't be a big issue in streaming. Buy the book and carry on reading. *Platforms, Promotion, and Product Discovery* Luis Aguiar (Research fellow), Joel Waldfogel, 2018. Digitization has vastly increased the amount of new music produced and available directly to consumers. While this has levelled the playing field between already prominent and new artists, creators may now be dependent on platform decisions about which songs and artists to promote. With Spotify emerging as a major interactive streaming platform, this paper explores the effect of Spotify's playlists on both the promotion of songs and the discovery of music by new artists using four approaches. First, we examine songs' streaming volumes before and after their addition to and removal from major global playlists. Second, we compare streaming volumes for songs just on and just off algorithmic top 50 playlists. Third, we make use of cross-country differences in inclusion on New Music Friday lists, using song fixed effects to explain differences in streaming. Fourth, we develop an instrumental variables approach to explaining cross-country New Music Friday rank differentials based on home bias. Being added to Today's Top Hits, a list with 18.5 million followers during the sample period, raises streams by almost 20 million and is worth between 116,000 and 163,000. Inclusion on New Music Friday lists substantially raises the probability of song success, including for new artists. **Spotify Teardown** Maria Eriksson, Rasmus Fleischer, Anna Johansson, Pelle Snickars, Patrick Vonderau, 2019-02-19. An innovative investigation of the inner workings of Spotify that traces the transformation of audio files into streamed experience. Spotify provides a streaming service that has been welcomed as disrupting the world of music. Yet such disruption always comes at a price. Spotify Teardown contests the tired claim that digital culture thrives on disruption. Borrowing the notion of teardown from reverse engineering processes, in this book a team of five researchers have playfully disassembled Spotify's product and the way it is commonly understood. Spotify has been hailed as the solution to illicit downloading, but it began as a partly illicit enterprise that grew out of the

Swedish file sharing community Spotify was originally praised as an innovative digital platform but increasingly resembles a media company in need of regulation raising questions about the ways in which such cultural content as songs books and films are now typically made available online Spotify Teardown combines interviews participant observations and other analyses of Spotify's front end with experimental covert investigations of its back end The authors engaged in a series of interventions which include establishing a record label for research purposes intercepting network traffic with packet sniffers and web scraping corporate materials The authors innovative digital methods earned them a stern letter from Spotify accusing them of violating its terms of use the company later threatened their research funding Thus the book itself became an intervention into the ethics and legal frameworks of corporate behavior
