[Sams Teach Yourself Oracle8i on Windows NT in 24 Hours](#) Meghraj Thakkar, 1999 Annotation This book will introduce

Oracle's new product in a way that's specific to Windows NT. Most Oracle books focus on UNIX or cross platform installations, not mentioning issues specific to Windows NT. Each chapter is designed to be read in an hour's time so readers can become productive quickly. This book will focus mainly on the graphical tools such as Oracle Enterprise Manager. Readers will find basic database information but not theory. **Oracle8i Advanced PL/SQL Programming** Scott Urman, 2000. Experienced system administrators, database administrators and application designers will find hands on information needed to use PL/SQL to its fullest potential. Special elements include Oracle8i coverage, explanations on how to use examples for real world applications and a CD ROM containing the script samples covered as well as Oracle and third part tools such as Oracle Procedure Builder and SQL Station. **Oracle8i For Dummies** Carol McCullough-Dieter, 2000-12-15. Oracle8i integrates Java programs but learning Oracle8i can be a daunting task. Professional Oracle database administrator McCullough Dieter walks readers through the basics before she guides them into the essentials creating and administering Oracle databases, creating tables, tablespaces, objects and relationships among objects, user administration and security data. **Oracle PL/SQL Programming** Steven Feuerstein, 1999. This guide is designed to bring you up to speed as quickly as possible on the new PL/SQL features of Oracle8i. It covers autonomous transactions, invoker rights, new built in packages and much more.
