Palm Development:

Professional Palm OS Programming Lonnon R. Foster, Glenn Bachmann, 2005-04-22 Professional Palm OS

Programming is everything programmers need to create applications for the world's most popular operating system for handheld devices. Veteran Palm developer Lonnon Foster, who has been developing commercial applications for the platform since its introduction nearly a decade ago, provides readers with hands-on instruction, lots of code and advice that only comes from the trenches, giving readers everything they need to build cutting-edge applications and take advantage of the features of both Garnet and Cobalt. Coverage includes: Building forms, menus and user interfaces; Managing memory; Tying into Palm's standard applications such as the Calendar, Phonebook or Tasks; Storing program data on removable storage cards; Building network-enabled applications; Creating web applications for Palm; Working with Palm OS' new support for Web Services; Programming for new device features such as jog dials, rocker switches, 5-way navigators; Working with sounds, graphics, multimedia and new high-resolution color screens; Encrypting and decrypting data; Wi-Fi, Bluetooth and wireless networking; and more.

The Resources of the Empire and Their Development Evans Lewin, 1924 *Biofuels* Zhen

Fang, 2013-01-23 This book overviews social, economic, environmental and sustainable issues by the use of biofuels written by professionals. It should be of interest for students, researchers, scientists and technologists in biofuels. *Intensified Systems of Farming in the Tropics and Subtropics* J. A. N. Wallis, 1997-01-01 Environmentally Sustainable Development Studies and Monographs Series No 19. Five years have passed since the United Nations Conference on Environment and Development, better known as the Rio Earth Summit. Almost all the countries of the world attended the conference and committed themselves to the policies and programs laid out in Agenda 21, the action plan of the summit. The World Bank and other international agencies have sought to be active partners in implementing the agenda. This report is part of the Bank's current efforts to review the progress made over the past five years and to make plans for improved effectiveness for the future. The paper is divided into two parts. Part I looks at the broad picture, assessing some of the large challenges for the future and outlining thematic principles. Part II provides concise reviews of the majority of the chapters of Agenda 21 and relates them to the standpoint of Bank activities.

[Climate Change and Business](#) Teresa da Silva Lopes, Paul Duguid, Robert

Fredona, 2025-04-30 Climate change is the greatest market failure in world history and thus the most urgent challenge in the world of business for the foreseeable future. This book brings together experts to shed light on the historical impact of business on climate change and of climate change on business. The book shows how corporate responses to climate change emerged out of earlier environmental concerns, regulatory frameworks and in many cases already established business strategies. Contributors to the book analyse the evolution of business strategies to navigate environmental challenges even before climate crisis was widely recognised as an urgent concern. The historical insights presented by this book will be essential reading for business historians as well as students, scholars and reflective practitioners with an interest in the

De-centring Land Grabbing Peter Vandergeest, Laura

Schoenberger, 2019-10-23 Southeast Asia has been portrayed as a key site in the global land grab. Featuring leading scholars in the field this collection critically examines the nature and extent of land grabbing in Southeast Asia and seeks to locate this phenomena in broader agrarian and environmental transitions AET The individual contributions suggest that there is little evidence of a global land grab in Southeast Asia but that over the last ten years the surge of plantations and processes of land grabbing has been a key feature in the region. The collection considers how broader AET processes may be brought more clearly into focus by decentring land grabbing including consideration of its absence as well presence. The diversity of cases in this collection coalesces around the productive tension in land grab studies between global capitalist processes on the one hand and context specificity and contingent motivations fuelling the expansion of large scale plantations for oil palm, rubber, cassava and other cash crops on the other hand. The contributors further broaden the entry points to consider cross sectoral AET processes such as enclosures for mining, conservation and hydropower and explore the contingencies that help to maintain smallholder production. The chapters originally published as a special issue in *The Journal of Peasant Studies*
