Recycling is commonly cited as one of the preferred methods of waste reduction and this book summarizes a recent study of paper recycling in Europe which investigated the entire production and disposal process using a life cycle methodology. The results of the study underline the economic and environmental advantages of paper recycling but more controversially they also show how under certain conditions the renewable character and the high energy content of paper seem to make energy recovery more attractive than recycling. **Recycled Papers** Claudia G. Thompson, 1992 Paper is the largest single component of municipal solid waste and the recycling of paper must be part of any resolution to the current garbage crisis. Because there are no uniform standards for the generic term recycled it is still difficult for paper users to make environmentally responsible purchasing decisions. Myths, misinformation and confusion abound. This first comprehensive guide to recycled printing and writing papers will therefore be an invaluable resource for anyone involved with printing production design or issues of recycling in general. The book itself printed on four different types of recycled paper is a demonstration of the quality that informed designers and publishers can achieve. In concise nontechnical language Claudia Thompson explains the dimensions of the solid waste problem, the history of papermaking, the elements of recycled paper production including current definitions and standards, the physical properties and printing characteristics of recycled papers, the potential impact of designers on recycling and possibilities for the future. **Recycled Papers: The Essential Guide** was sponsored by the American Institute of Graphic Arts under the direction of Claudia Thompson a graphic designer and Principal of Claudia Thompson Design in Cambridge Massachusetts. Ms. Thompson's work on environmental issues started with the first Earth Day in 1970 and she has been researching the subject of recycled papers since 1988. **Reduce, Reuse, Recycle Paper** Jared Siemens, 2018-08 Did you know that each American uses about seven trees worth of paper each year. Learn how people can use paper wisely in Reduce Reuse and Recycle Paper. **Follow That Paper!** Bridget Heos, 2016-07 A child tosses old homework paper into a recycling bin and the story follows that paper through the process of recycling until it becomes usable paper again. Includes Recycle it Yourself activity and further resources.
