Paradox Of Chinas Post Mao Reforms:

The Paradox of China's Post-Mao Reforms Merle Goldman, Roderick MacFarquhar, 1999 China's bold program of reforms launched in the late 1970s, the move to a market economy and the opening to the outside world ended the political chaos and economic stagnation of the Cultural Revolution and sparked China's unprecedented economic boom. Yet while the reforms made possible a rising standard of living for the majority of China's population, they came at the cost of a weakening central government, increasing inequalities, and fragmenting society. The essays of Barry Naughton, Joseph Fewsmith, Paul H. B. Godwin, Murray Scot Tanner, Lianjiang Li, and Kevin J. O'Brien, Tianjian Shi, Martin King Whyte, Thomas P. Bernstein, Dorothy J. Solinger, David S. G. Goodman, Kristen Parris, Merle Goldman, Elizabeth J. Perry, and Richard Baum, and Alexei Shevchenko analyze the contradictory impact of China's economic reforms on its political system and social structure. They explore the changing patterns of the relationship between state and society that may have more profound significance for China than all the revolutionary movements that have convulsed it through most of the twentieth century. **State and Society in**

China's Democratic Transition Xiaoqin Guo, 2012-10-12 This book examines China's process of democratic transition and the role of state and society in this process. **The Politics of Rural Reform in China** Christian Göbel, 2010-06-10 Based on a treasure trove of information collected through fieldwork interviews and painstaking documentary research through the Chinese and Western language presses, this book analyzes one of the most important reforms implemented in China over the past decade: the rural tax and fee reform, also known as the Third Revolution in the Countryside. The aim of the tax was to improve social stability in rural China, which has become increasingly shaken by peasant protests, many of them large scale and violent. By examining the gap between the intentions of the reform and the eventual outcomes, Göbel provides new insights into the nature of intergovernmental relations in China and highlights the ways in which the relationship between the state and the rural populace has fundamentally changed forever. *The Politics of Rural Reform in China* will appeal to students and scholars of Chinese politics, governance, and development studies. *Unparalleled Reforms* Christopher Marsh, 2005-01-01 The reforms of the Soviet and Chinese communist regimes were unparalleled both in the radical precedent setting reforms attempted by the two countries and in the outcomes of these attempts. While the Soviet Union collapsed quickly in the midst of its reforms, more than a decade later China, the world's most populous country, still stands as a testament to the resilience of Communist rule. It is this phenomenon that Christopher Marsh explores in *Unparalleled Reforms*. Marsh goes beyond simply discussing the differing initial conditions, the sequencing of reform, and cultural differences to also consider the objectives and intentions of the policy makers and leaders that directed the reform processes and the interdependent nature of politics on the world stage. *Unparalleled Reforms* offers the reader a sophisticated understanding of the nature of political reform and develops a theoretical model that can account for commonly overlooked factors that affect political processes in all types of political systems. In a class all its own, this is an important work for

scholars interested in comparative politics international relations economics Asian studies and Russian studies *China's Automotive Modernization* G. Chin,2010-01-29 As a window for understanding the relationship between globalization and the state s pursuit of national industrial development this book examines how and why the Chinese government succeeded in leveraging China s international competitive advantages to modernize the country s automotive industry **Dreadful Desires** Charlie Yi Zhang,2022-02-07 In *Dreadful Desires* Charlie Yi Zhang examines how the Chinese state deploys affective notions of love to regulate the population and secure China s place in the global economy Zhang shows how the state frames love as a set of desires that encompass heteronormative intimacy familial and communal attachment upward mobility and private property ownership These desires as circulated in performance in the nationalistic ceremony same sex romantic fan fiction the wildly popular reality television dating show *If You Are the One* and the cult of patriarchal personality around Xi Jinping are explicitly based in oppressive systems of gender class and sexuality Zhang contends that such desires connect love to economic survival and gender normativity in ways that underwrite Chinese neoliberalism at the expense of individual flourishing By outlining how state framed forms of love create desires that cannot be fulfilled Zhang places China at the forefront of using affective attachments to nation leader and family in the global shifts toward exploitation and authoritarianism *Pacific Automobility* Gijs Mom,2022-09-13 The beginning of the 21st century has seen important shifts in mobility cultures around the world as the West s media driven car culture has contrasted with existing local mobilities from rickshaws in India and minibuses in Africa to cycling in China In this expansive volume historian Gijs Mom explores how contemporary mobility has been impacted by social political and economic forces on a global scale as in light of local mobility cultures the car as an adventure machine seems to lose cultural influence in favor of the car s status character **State and Society in 21st Century China** Peter Hays Gries,Stanley Rosen,2004-08-02 Written by a team of leading China scholars this book explores the dynamics of state power and legitimation in twenty first century China and the implications of changing state society relations for the future viability of the People s Republic Key subjects covered include the legitimacy of the Communist Party state society relations ethnic and religious resistance rural and urban contention nationalism popular and youth culture prospects for democracy Strategies of Urban Development in China's Reforms Lan-Chih Po,2001 **The Chinese Revolution in Historical Perspective** John E. Schrecker,2004-01-30 This fully updated second edition provides a succinct and self contained history of China The text emphasizes the relationship between China s modern era and its past employing a unique approach that presents the story in terms of traditional Chinese historical theories When the West enters the scene in modern times Schrecker fits its impact into the Chinese story rather than the reverse as is commonly done This study demonstrates that traditional China was not homogeneous or changeless thus offering a much needed corrective to common stereotypes about other cultures that is essential for both classroom use and for the general reader *The Chinese Revolution in Historical Perspective* available here in a fully updated second edition provides a succinct and self contained

Beyond the Asian Crisis Anis Chowdhury, Iyanatul Islam, 2001 As Southeast and Northeast Asia recover from the Asian crisis and return to a state of growth the authors of this book assess the lessons to be learned from the crisis to achieve sustainable development in the future While the importance of each factor contributing to the crisis varies from country to country their collective experience has created unprecedented turmoil in current thinking on development policy The authors

argue that the major schools of thought need paradigm changes in the wake of the crisis Those who believe that a strong state or system of semi democracy is essential for economic growth have been disproved by the sudden collapse of these economies These countries must now adapt to the fact that society must be open to ideas and democratise its polity to achieve innovation driven sustainable development Those who used the success of East Asian economies as a vindication of the neo classical orthodoxy referred to as the Washington consensus must now see the follies of progressive withdrawal of the government from the economic sphere and of unfettered flows of short term capital This book offers a timely and reflective analysis of the Asian financial crisis and brings together a detailed overview of the different and often competing responses within the countries of the region It will be welcomed by students and scholars with an interest in Asian economics development studies international political economy and international relations

The Making of China's Exchange Rate Policy Leong H. Liew,Harry X. Wu,2007

This book examines the major economic and political factors influencing China s exchange rate policies from the foundation of the People s Republic to the present It considers how national economic and political priorities international influences domestic institutional interests and the new constraints imposed by China s rapidly globalising post Mao economy determine exchange rate policy The authors argue that China s exchange rate decisions were not made simply in response to external pressures rather that they were formed on the basis of domestic assessments of domestic circumstances to serve domestic interests They go on to illustrate that such decisions are made on the basis of what policymakers perceive are the nation s best interests and thus constitute dynamic interplay between national priorities and the interests of institutional and non institutional actors in the policy arena Fulfilling the
