Journal of Official Statistics, 1986 Interfaces, 1994 Seeks to improve communication between managers and professionals in OR MS **Building Implementable Marketing Models** Philippe A. Naert, Peter S.H. Leeflang, 2013-12-01 The observation that many models are built but few are used has almost become a commonplace in the management science and operations research literature Nevertheless the statement remains to a large extent true today also and perhaps even more so where marketing models are concerned This led Philippe Naert now about four years ago to write a concept text of a few hundred pages on the subject of how to build implementable marketing models that is models that can and will be used One of the readers of that early manuscript was Peter Leeflang He made suggestions leading to a more consistent ordering of the material and proposed the addition of some topics and the expansion of others to make the book more self contained This resulted in a co authorship and a revised version which was written by Peter Leeflang and consisted of a reshuffling and an expansion of the original material by about fifty per cent Several meetings between the co authors produced further refinements in the text and the sequence of chapters and sections after which Philippe Naert again totally reworked the whole text This led to a new expansion again by fifty per cent of the second iteration The third iteration also required the inclusion of a great deal of new literature indicating that the field is making fast progress and that implementation has become a major concern to marketing model builders

DSS 2.0 - Supporting Decision Making With New Technologies Sven Carlsson, Patrick Brezillon, 2014-05-15 Advances in technology have resulted in new and advanced methods to support decision making For example artificial intelligence has enabled people to make better decisions through the use of Intelligent Decision Support Systems DSS Emerging research in DSS demonstrates that decision makers can operate in a more timely manner using real time data more accurately due to data mining and big data methods more strategically by considering a greater number of factors more precisely and inclusively due to the availability of social networking data and with a wider media reach with video and audio technology This book presents the proceedings of the IFIP TC8 Working Group 8 3 conference held at the Universit Pierre et Marie Curie in Paris France in June 2014 Throughout its history the conference has aimed to present the latest innovations and achievements in Decision Support Systems This year the conference looks to the next generation with the theme of new technologies to enable DSS 2 0 The topics covered include theoretical empirical and design science research case based approaches in decision support systems decision models in the real world healthcare information technology decision making theory knowledge management knowledge and

resource discovery business intelligence group decision support systems collaborative decision making analytics and big data rich language for decision support multimedia tools for DSS Web 2 0 systems in decision support context based technologies for decision making intelligent systems and technologies in decision support organizational decision support research methods in DSS 2 0 mobile DSS competing on analytics and social media analytics The book will be of interest to all those who develop or use Decision Support Systems The variety of methods and applications illustrated by this international group of carefully reviewed papers should provide ideas and directions for future researchers and practitioners alike
