**Optimization Methods for a Stakeholder Society** W.K. Brauers, 2013-12-11 For both public and private managers the book *Optimization Methods for a Stakeholder Society* is today's key to answer the problem of a sustainable development world. This world has to take into account the meaning of all stakeholders involved and has to reconcile a number of objectives such as economic growth, employment, and preservation of the ecosystem. Traditional methods such as cost-benefit are outmoded as they translate all these objectives into monetary costs, a materialistic approach. On the contrary, objectives have rather to stick to their own units, eventually indicators.

**Multiple Criteria Decision-Making Methods** Adarsh Anand, Mohini Agarwal, Deepti Aggrawal, 2022-10-24 This book provides application of multi-criteria decision-making techniques for managerial discretion. **New Methods and Applications in Multiple Attribute Decision Making (MADM)** Alireza Alinezhad, Javad Khalili, 2019-08-23 This book presents 27 methods of the Multiple Attribute Decision Making (MADM) which are not discussed in the existing books nor studied in details using more applications. Nowadays, decision-making is one of the most important and fundamental tasks of management as an organizational goal achievement that depends on its quality. Decision-making includes the correct expression of objectives, determining different and possible solutions, evaluating their feasibility, assessing the consequences, and the results of implementing each solution and finally selecting and implementing the solution. Multiple Criteria Decision Making (MCDM) is a sum of the decision-making techniques. MCDM is divided into the Multiple Objective Decision Making (MODM) for designing the best solution and MADM for selecting the best alternative. Given that the applications of MADM are mostly more than MODM, wide various techniques have been developed for MADM by researchers over the last 60 years, and the current book introduces some of the other new MADM methods.
