laborious preliminary investigations necessary to enable him to do some measure of justice to his subject In order that he might have at hand when required suitable examples illustrating every point that it might be needful to refer to the author before writing a single line of the text examined nearly every orchestral score in his library He consulted many hundreds of scores by the great masters varying in length from a few pages to six or seven hundred or even more He made a list of some fourteen hundred passages for quotation or reference far more of course than it would be possible to make use of because without such a list at his side he knew that he would probably waste hours in hunting for a particular illustration when he required it The result has fully justified his method of procedure for the actual writing of the volume has occupied a comparatively short time The preliminary work on the other hand required more than a year and a half to complete it In planning the present work it appeared advisable to deal first with the instruments of the orchestra individually leaving till later the important subject of their combination though this is of necessity incidentally shown to some extent in the examples given After two preliminary chapters treating of the qualifications needful to the student of the composition of the modern orchestra and of the arrangement of the score the various departments of the orchestra strings wind and percussion are taken in turn and the mechanism character and special features of each instrument explained in detail About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
